

## Release Notes

TO: TransAM Users

DATE: July 2, 2021

TOPIC: TransAM Version 2.15.0

---

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of bug fixes.

### **Bug Fixes:**

- Using breadcrumbs on the pages was causing a 500 error. This has been resolved.
- Service Status was incorrectly rendering as “Unknown” for many assets. These assets have been updated.
- Asset Types were blank in the TAM Policy Group Metrics. This has been resolved.
- Ensured that usage reports were rendering for all clients.
- Removed irrelevant popups that were occurring when saving rail car or ferry assets.
- Removed a 500 error that was occurring when creating a Guideway asset.
- Removed a 500 error that was occurring when attempting to export the Early Disposition Proposed assets.
- Ensured that the Service Type Filter within the fleets page is working as expected.
- Removed the 500 error that was occurring when deleting an asset.
- Ensured that the subtype within the asset inventory table correctly matches what is listed in the asset’s profile.
