

Release Notes

TO: TransAM Users

DATE: January 28, 2022

TOPIC: TransAM Version 2.19.0

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of new features and bug fixes.

General System Improvements:

- Added Google analytics functionality to TransAM instances in order to improve reporting capabilities and provide insights for future enhancements
- Performed required maintenance on TransAM production RDS instances
- Date of Disposition and Revenue from Sale were both added as column options within the inventory tables.

Bug Fixes:

- DRPT was experiencing a 500 error when viewing specific asset profile pages after an asset transfer. This has since been resolved.
- Bulk update templates were not processing when uploaded. Development has resolved and all templates are now processing as expected.
