

Release Notes

TO: TransAM Users

DATE: November 12, 2021

TOPIC: TransAM Version 2.17.0

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of new features and fixes.

General System Improvements:

- Created a Bulk Updates interface for PennDOT. This interface performs as an “excel-like” tabular interface which can be used to quickly update asset profile information as well as key life cycle events.
- Created an oversight feature for PennDOT that includes a workflow tracking process which can be used by PennDOT staff to set up and carry out site-visit or desk reviews of subrecipient program and contract compliance.
- Cleaned up the header and footer to improve system load time

Bug Fixes:

- Added configuration to control activation of PennDOT’s new project prioritization tool
- The Asset Type by Org report was showing incorrect asset counts for organizations. This has since been corrected.
