1.0 Welcome!

TransAM is an asset management system designed to support the needs of State DOTs, Planning Agencies, and Transit Agencies. The system manages assets of all types, including revenue vehicles, equipment, facilities, and infrastructure. The system stores crucial information about every asset category and maintains a complete history of the asset as it ages, including; changes in condition, usage, value/depreciation, and other lifecycle events are, that are recorded and can be reviewed at any time. A variety of reports can be generated on asset condition, value, and capital replacement needs.

TransAM, an open-source asset management platform developed by Cambridge Systematics. TransAM focuses on transit assets and project planning, and is designed to make it easier for State DOTs, Planning Agencies, and Transit Agencies to share and exchange information related to assets, projects, and funding.

1.1 Initial Log In and Password Reset

If this is your first time logging in, you should receive an email following the creation of your user account, with a link instructing you to reset your password. Click the link in the email and you will be directed to enter your email address in order to reset your password; enter your email address and click the “Send me reset password instructions” button. If you are an existing user and you forgot your password, you will be taken to the same screen by clicking on the “Forgot Your Password” link on the login page.

Figure 1 Password Reset Request Screen

TransAM OCPD

Instructions

Enter your email address that you use to login to TransAM and click the button. If your email address is found in the system you will get an email with instructions for resetting your password. If you don't receive an email in a few minutes contact your program manager.

Forgot Password

Email

Send me reset password instructions

The email address you enter, must match the email address entered when your account was established

Once you receive your “Reset Password Instructions” email, click on the “Change my password” link within the email, you will be redirected to the system site in your web browser, and you will be prompted to enter your new password twice. Once you enter your password twice, if it meets the password requirements, you will be automatically logged in.

Figure 2 Set/Reset Password Screen

TransAM OCPD

Instructions

Your password must conform to the following:

- At least 8 characters
- Contain at least one upper case and one lower case letter
- Contain at least one number

Change Your Password

New password

Confirm your new password

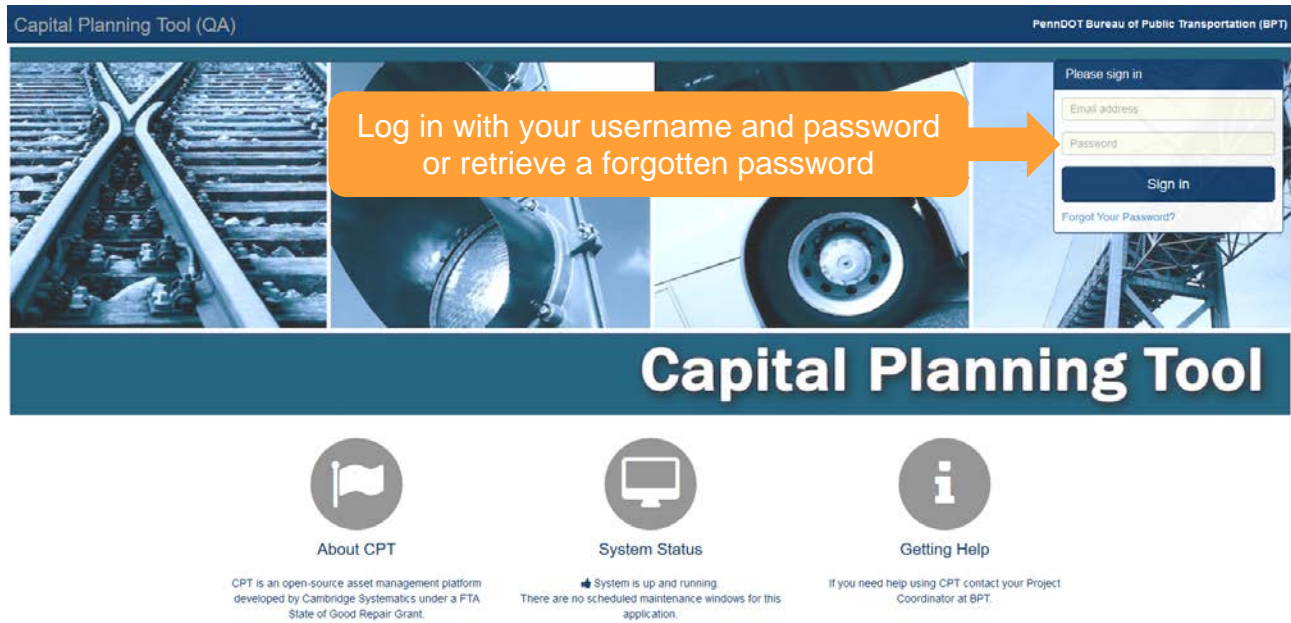

Change my password

1.2 Ongoing Site Access

The system can be accessed via the following URL: <https://transam-ocdp.camsys-apps.com>.

Ongoing access can be obtained by bookmarking the site URL in your web browser and clicking on the link, upon which you'll be greeted with a login screen. Enter your credentials in the appropriate fields to login. You also can request a password reset by pressing the "Forgot Your Password?" button.

Figure 3 Login Screen

2.0 Dashboard

2.1 Dashboard Elements

Once you're logged in, your first experience will be the dashboard. The dashboard has a variety of elements.

The dashboard widgets highlighted below are: Asset Summary, Capital Projects, My Notices, My Messages, My Tasks, and Audit Summary. These provide a quick glance at the contents within the system.

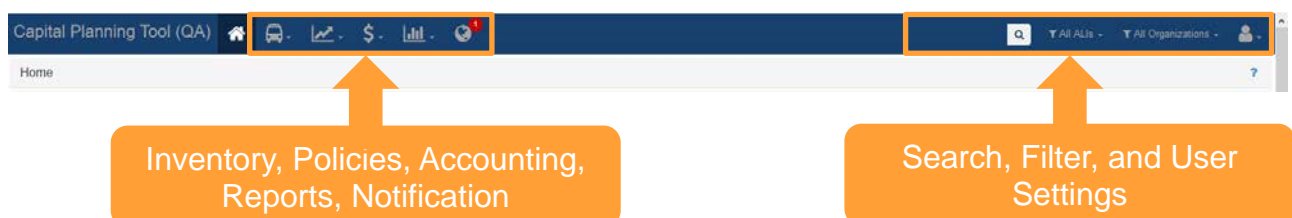

Figure 4 Dashboard Elements

2.2 Header Menu and Controls

The menu icons at the top guide you to the deeper content pages within the system: Inventory, Policies, Accounting, Reports, and Notifications. There also are controls to search, filter Activity Line Items (ALI) or organizations, and user settings.

Figure 5 Header Menu

3.0 General Features and Tools

As you progress through the system, there are some common interface elements that you'll encounter often.

3.1 Table Controls

There are lots of tables inside the system. The tables have common control tools that allow you to manipulate the table contents and export the table.

On header elements, you'll notice two arrows to the right of each column. These controls sort the table ascending or descending based on this column.

Figure 6 **Sorting Controls**

The Export All button to the top right of the table exports all table elements into an Excel table.

Figure 7 **Export Button**

There also are a set of tools to the top right of the table. The left button either displays the table with pagination (e.g., the table shows only a configurable number of rows per page), or the entire table.

The center button allows the user to show or hide different columns. Check marks next to the column indicate if a column will be shown and allow the user to toggle the column on or off.

The right button exports the current table view (complete with filters and excluding hidden elements) into a CSV, TXT, or an XLSX (Excel) file format.

Figure 8 **Table Tools**

3.2 Site Filters

Throughout the site, there are various opportunities to filter data. When you see the following icon it means you can pare down displayed data with a filter.

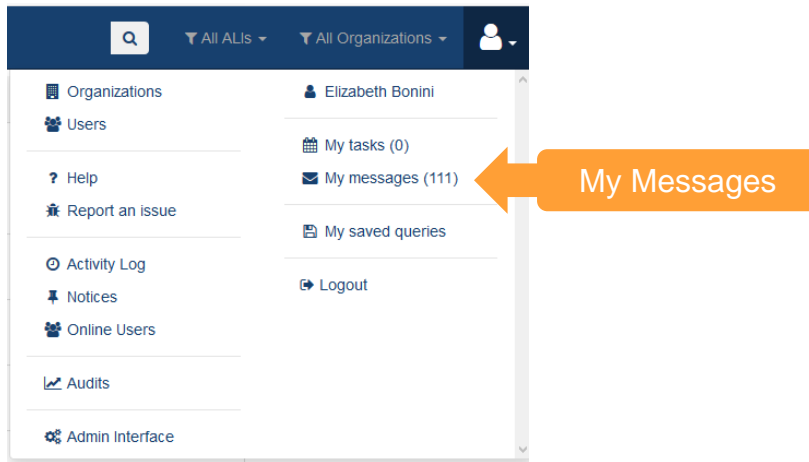

Figure 9 **Filter Icon**

3.3 Messages

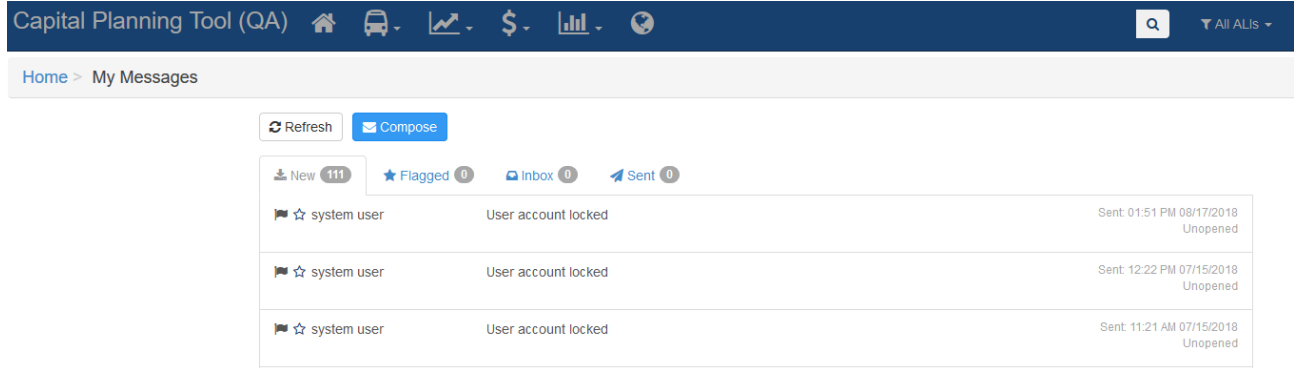

You can access Messages through the User Profile drop down menu.

Figure 10 **User Profile**
Messages

Users are able to send and receive messages to one or more users through the interface.

Figure 11 **Messages**

Selecting Compose will allow you to create a new message. Recipients options will be a list of users in your organization. You can enter the Subject and choose Low, Normal, or High Priority for the message. Type the intended message into the Message Body and press “Send...” when complete.

3.4 Organizations Filter

If you have oversight of several organizations, you can limit your scope down to certain organizations, in order to only view organization-specific data across the system.

Figure 13 Organization Filter

After you select the organizations you desire, make sure to click Update Selection at the top of the dropdown menu.

Figure 14 Organization Filter Selections

3.5 Search

The system includes a sitewide search feature. It can be found in the top center-right of each page. Click the magnifying glass icon and enter keywords to search sitewide for content.

Figure 15 Search Box

3.6 User and Organization Options

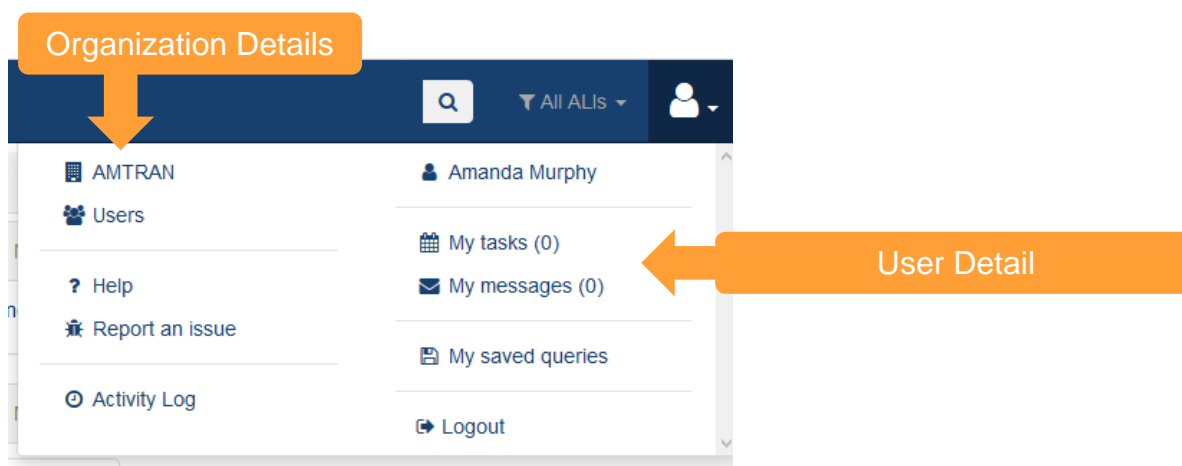

Each user has a menu with personal, organizational, and heads-up information at the top right of the screen.

Figure 16 User Menu

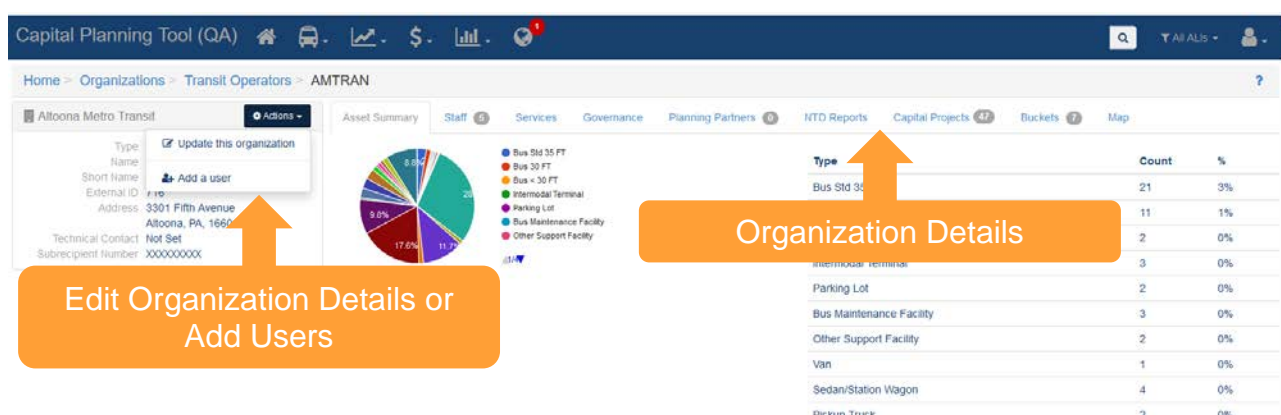

From here, users can explore information about their own organization and their coworkers in the Organization and Users section.

Figure 17 User Menu Dropdown

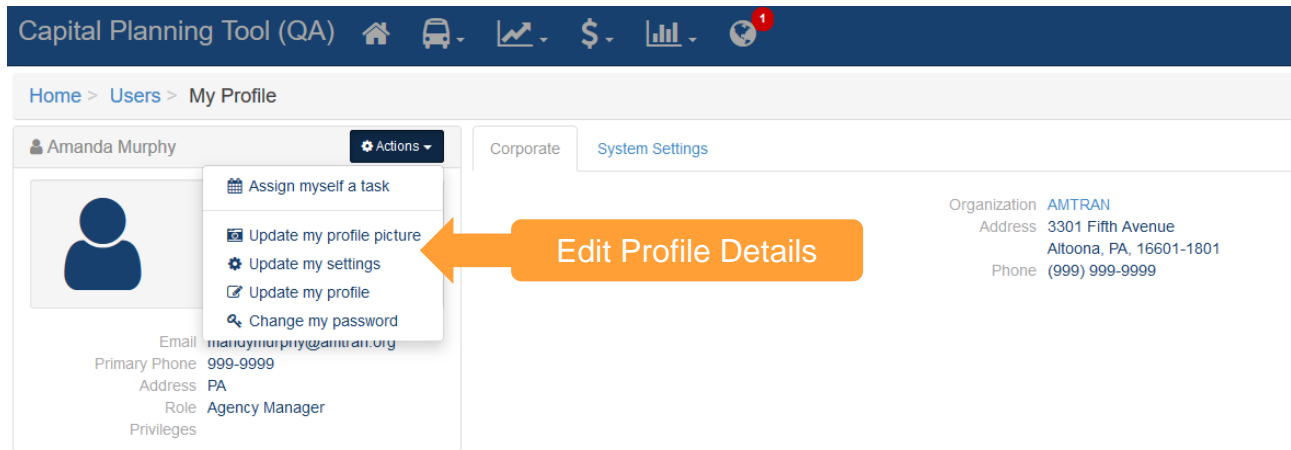

Clicking on your organization name, will allow you to view and edit organization-specific information, and perform certain functions such as adding users.

Figure 18 Organization Details

If you click your own name, you can see details about your profile and edit them. You also can assign yourself a task to complete.

Figure 19 Profile Details

You can browse this help document or submit an issue in the Help and Report an issue section. Reporting an issue is easy—just fill out the required information with as much detail as you can provide.

Figure 20 Report an Issue

Report an Issue

Use this form to make comments, suggestions for enhancement, or report any issues you may be having with CPT. For example,

- Make a suggestion about how we can make CPT better
- Report a bug that you are experiencing
- Suggest future enhancements that we could make

To track down and fix bugs it is helpful if we know what type of web browser you are using particularly if you are using a Microsoft browser. You can usually find this information by selecting the **About** menu item from your browser. If you don't know what browser you are using select **Unknown**.

Any information provided will be reviewed by a product manager and someone may get in touch with you to discuss your comments.

*** Issue Type**

*** Web Browser Type**

*** Comments**

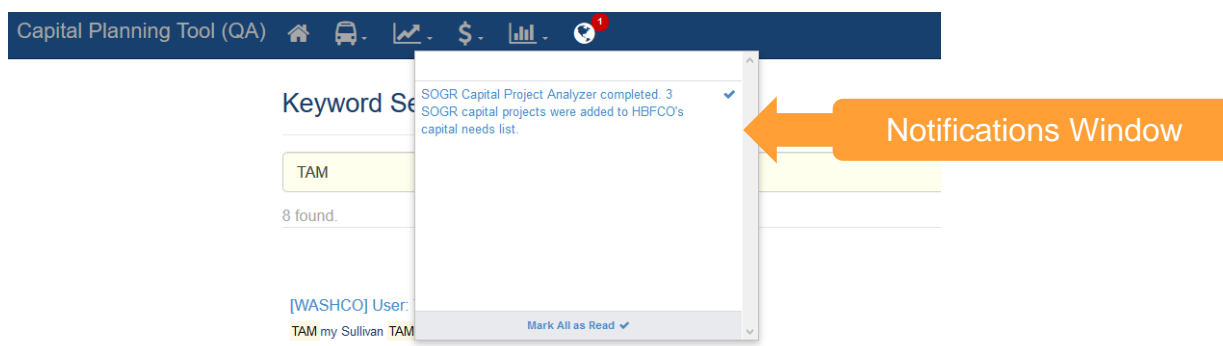

Please provide as much detail as you can...

Create Issue

3.7 Notifications

The notifications dropdown alerts you when there's activity in the system that you should be aware of. The globe at the top of the page will display a number with the count of "unread" notifications since your last check. Clicking on a notification item will take you to the change and mark the notification as read. You also can click individual checkmarks to dismiss individual notifications or "Mark All as Read" to quickly dismiss all notifications.

Figure 21 Notification Drawer

3.8 Help

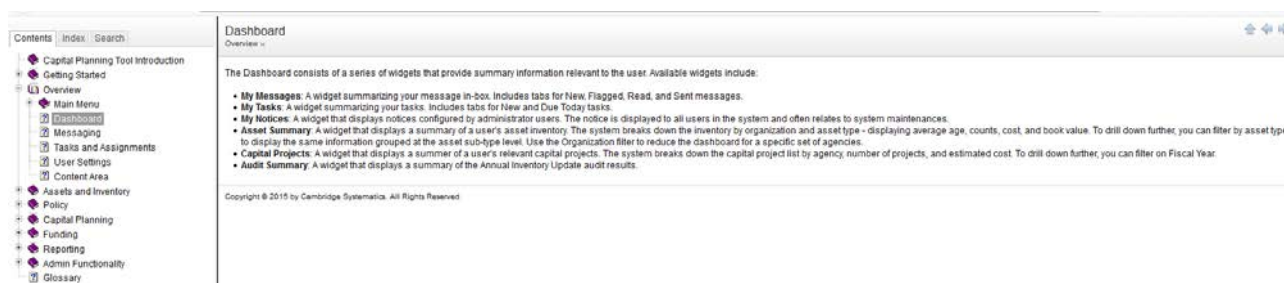

At the top right of each page is a "?" icon.

Figure 22 Help Icon

Clicking the help icon will bring you to the help content regarding that page. The help content provides detailed descriptions of each of the page elements. You also can navigate to help content for other pages. Via the contents, index, or search tabs in the left pane.

Figure 23 Help Content

4.0 Asset Inventory

Management of organization assets is carried out through the Asset Inventory dropdown menu. It contains a variety of tools and functions that streamline asset management.

Figure 24 **Asset Inventory Dropdown**

4.1 Add an Asset

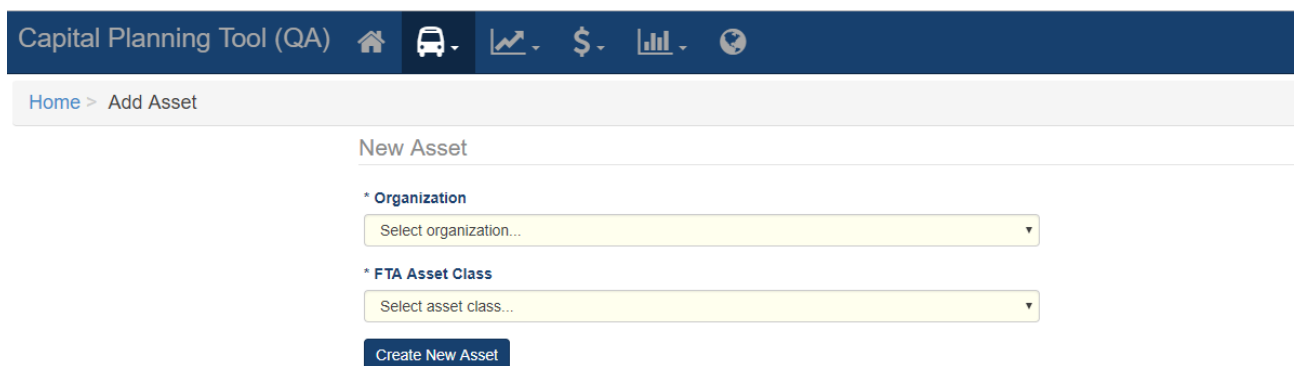

Adding new assets to the asset inventory is simple. First select “Add Asset” from the Asset Inventory dropdown.

Figure 25 Adding an Asset

Select an Organization and an Asset Class, then click “Create New Asset.”

4.2 Accessing Existing Assets

Every asset is categorized by category (e.g., Revenue Vehicles, Equipment), class (e.g., Buses (Rubber Tire Vehicles, Rail Cars), type (e.g., BU-Bus, RL-Commuter Rail Locomotive), and a subtype (e.g., Bus Std 40 FT, Bus Articulated) as part of a standardized hierarchy. The asset category, class, type, and subtype relationship is the taxonomy that defines your inventory and dictates the attributes or data fields that exist for assets. The list of available category, class, and type options are standardized across the system, while subtype options and some data fields have been specifically configured for your specific system deployment.

Clicking on an asset class will drill down on the assets an organization possesses within that particular category and class.

When you access the specific asset record, users can view the highlights section. The highlights sections contains asset summary information such as: a history log, location information, asset charts, asset value information, associated capital projects, and audit results. In addition, tasks, comments, documents, and photos can all be viewed, updated, and edited.

In addition to accessing asset highlight information, users can view profile or summary data for that asset.

Figure 32 Asset Record: Profile and Summary

4.3 Editing or Updating Existing Asset Profile Data

Editing asset profile data allows users to modify core attributes that are not expected to change, but corrections may be necessary from time to time. Profile data can be modified by clicking on the field, editing the data, and clicking the check mark; clicking the “X” or clicking outside the field will result in any changes not being saved.

Figure 33 Editing the Profile of an Existing Asset

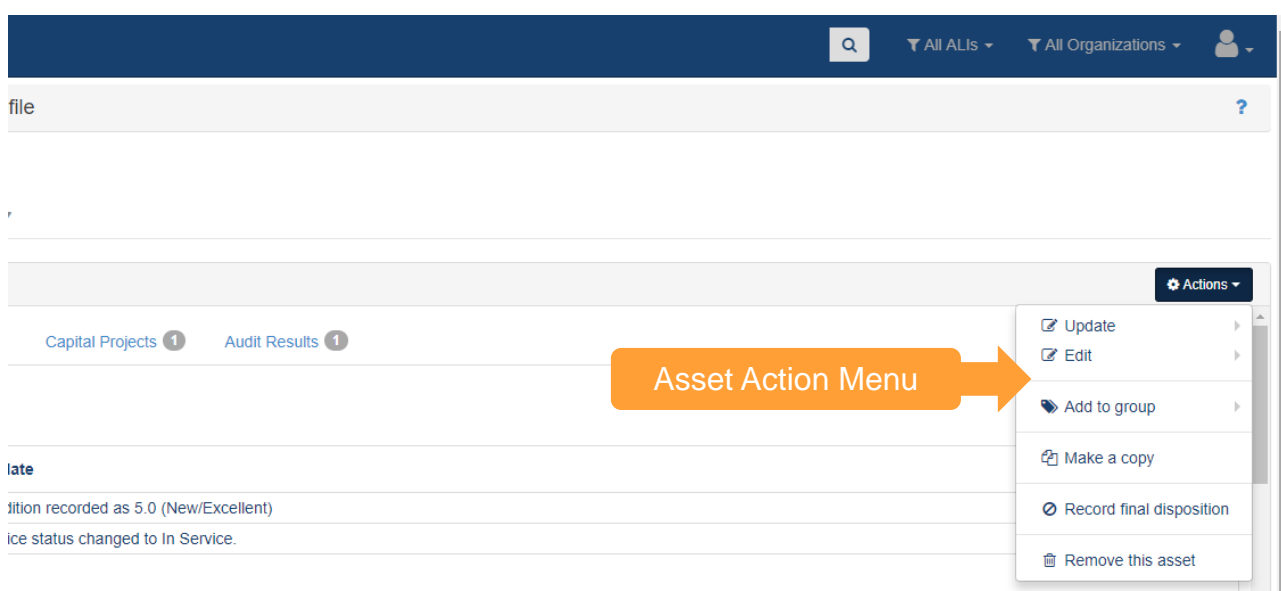

4.4 Updating Existing Asset Lifecycle Data

Asset lifecycle-related information can be edited, updated, changed, or deleted from the action menu in the top right of the screen.

Updating an asset will allow changes to attributes that are expected over the lifecycle of an asset. Asset details such as replacement status, mileage, etc. are expected to be updated periodically. Other actions should only need to happen one time during the life of an asset, such as requesting early or final disposition of an asset.

Removing an asset will permanently delete the asset and should be used only when absolutely necessary. This may option may only be available at certain permission levels.

Figure 34 Updating the Lifecycle of an Existing Asset

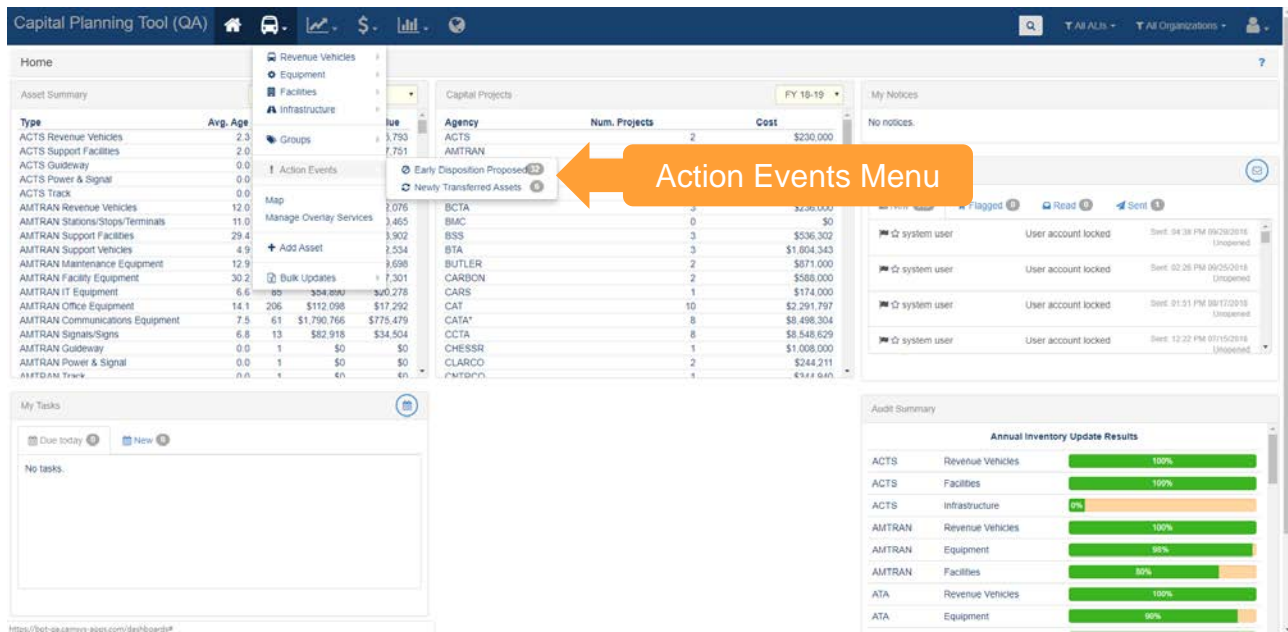

4.5 Action Events (Disposition and Transfer Review)

During an asset's service life, it is possible that the asset might be sold, reprovisioned, traded in, or transferred. As a result, a special event exists to record relevant information, and review any disposition requests that may be submitted, in order to complete the disposition effort.

Action Events depend on the disposition of an asset to perform certain functions. The available functions will vary depending on individual permissions and organizational policy. Action Events occur when an asset is proposed for an early disposition or an asset is newly transferred. You can submit a request for early disposition from the action menu on an asset.

Figure 35 Asset Action Events (Disposition and Transfer)

An early disposition instance is where a vehicle fails to fulfill its expected life span. The real world is messy and sometimes mishaps such as accidents occur. Under these circumstances, the asset might require disposition before originally intended.

Record final disposition will keep a record of an asset's existence when it is no longer in service. This option will essentially archive an asset so that the history exists, but the asset is no longer considered in the pool of operational assets for an organization.

Early disposition requests can be reviewed from the Early Disposition Proposed page. Select the check box next to an asset, then select the button to Approve or Reject a proposed early disposition.

Figure 36 Early Disposition Requests

4.6 Adding or Updating Assets by Bulk Update

Bulk updates are a faster way to create and edit asset inventories when working with large quantities of asset data. This tool allows users to update service status, condition and mileage of existing inventory, record the last maintenance performed for assets, and identify assets that are going to be reprovisioned or disposed in this planning cycle using their favorite spreadsheet software externally.

Figure 37 Bulk Updates

Selecting “Bulk Updates” allows you to Create a new Template, Upload a Template, or see the status of an uploaded template. The main screen also shows previous bulk updates, their content, uploader, status, and stats about the contents of that update and the upload process.

Figure 38 Bulk Update Tools

Capital Planning Tool (QA)      							
Home > Bulk Updates							
<div>  Create a new Template  Upload a Template Filter Status ▾ </div>							
Agency	File Name	Content	Loaded By	Status	Num Rows Processed	Num Rows Added	
PIKECO	pikeco_transit_inventory_updates_file_handler_2018-04-17.xlsx	Inventory Updates	Toni Marino	Complete	30		
END		Inventory Updates	BETHANY JONES	Complete	84		
WBT	IT_EQUIPMENT_UPDATE.xlsx	Inventory Updates	BETHANY JONES	Complete	84		

The first step to a bulk update is Creating a Template. Click “Create a new Template”, then select your Template Type, Organization, and Asset Class, then select “Create Template.”

Figure 39 Bulk Update Details

Capital Planning Tool (QA) Home Bulk Updates Download Template

Bulk Update Templates

Use this form to customize and download an asset inventory update template. These templates can be used to:

- Update service status, condition, and mileage of existing inventory
- Record the last maintenance performed for each asset
- Identify assets that are going to be disposed or re-provisioned in this planning cycle

Once you click **create** a spreadsheet will be generated that you can save to your computer. After the template has been downloaded, open the template using Microsoft Excel and update the rows. Make sure to **save** the template after you have finished editing it.

When ready use the Upload function to upload the spreadsheet template to CPT and the updates will be processed.

Select Template and Asset Type

Template Type: Inventory Updates

Organization: All ALIS

PIA Asset Class: Select fta asset class...

Create Template

Choose these parameters

Select “Download File” and save the resulting spreadsheet on your computer.

Bulk Updates

Use this form to upload spreadsheets that you have downloaded from CPT and completed. The spreadsheets can contain either:

- Life Cycle Updates for existing inventory
- Disposition updates for existing inventory

Make sure to select the right type of content before uploading the file.

If you force the update, be aware that this might overwrite and change existing data that CANNOT be undone.

Once the file has been uploaded it will be processed by CPT and the inventory updated which might take a few minutes. You can check the progress by clicking on the file name in the table.

Spreadsheet

Browse... ata_transit_inventory_updates_file_handler_2018-06-13.xlsx

Select a spreadsheet that has been downloaded from CPT, edited, then saved

Upload spreadsheet

Select the parameters again and upload spreadsheet

If your file uploads successfully, the main Bulk Update screen should reappear with a “File was successfully uploaded banner” and you should see the most recent update appear at the top of the bulk update history. The system will perform the updates and a new notification will appear in your notification tray once all updates are complete.

Figure 43 Bulk Upload Processing

Agency	File Name	Content	Loaded By	Status	Num Rows Processed	Num Rows Added	Num Rows Failed	Processing Time
CATA*	cata_transit_inventory_updates_file_handler_2018-06-13.xlsx	Inventory Updates	Elizabeth Bonini	Unprocessed				0s
PIKECO	pikeco_transit_inventory_updates_file_handler_2018-04-17.xlsx	Inventory Updates	Toni Marino	Complete	30	25	0	2s

Each row in the Bulk Update table contains additional information and options if you click that update. Use this interface to identify any issues that might have occurred during the bulk upload process. From the actions menu, you can resubmit the file for processing, download that specific spreadsheet again, revert the changes made by this update, or remove the file used to update from the list.

4.7 Groups

Agencies can create an on-the-fly collection of assets called groups so that they can quickly recall commonly viewed assets all at once. They can be accessed from the Asset Inventory Menu.

Figure 45 Asset Groups

Individual assets can be added to the group from their details menu.

Figure 46 Adding an Asset to a Group

The screenshot shows the 'Capital Planning Tool (QA)' interface. The breadcrumb trail is: Home > Revenue Vehicles > Buses (Rubber Tire Vehicles) > Buses (Rubber Tire Vehicles) Profile. The page title is 'Revenue Vehicle Profile' with the asset details: CAT : 15GGB2713H3189913 : #1701 : GIL - Gillig Corporation : 35' Low Floor : 2017.

The 'Highlights' section includes tabs for History, Tasks, Comments, Documents, Photos, Charts, Asset Values, Capital Projects, and Audit Results. Below these is a table with columns 'Event', 'Date', and 'Update'. The table contains two rows: 'Condition' (2/26/2018, Condition recorded as 5.0 (New/Excellent)) and 'Service Status Update' (2/26/2018, Service status changed to In Service).

An orange arrow labeled 'Add an Asset to a Group' points to the 'Add to group' option in the 'Actions' menu. The 'Actions' menu also includes 'Update', 'Edit', 'Make a copy', 'Record final disposition', and 'Remove this asset'.

The 'Asset Summary' section on the left shows the profile details: Owner: CAT, Description: GIL 35' Low Floor, Asset Tag: #1701, External ID: GIL, Manufacturer: GIL, Class: Revenue Vehicles, Type: Bus 50d 35 FT, Status: In Service, Age: 0 yrs, Mileage: 156000.

The 'Profile' section on the right shows the 'Identification & Classification' tab. It displays the 'Vehicle Identification Number (VIN)' as 15GGB2713H3189913, the 'Asset ID' as #1701, and the 'External ID' as NTD ID.

5.0 Policies

A Policy is a set of parameters that establishes rules related to assets saved within the system. While an organization can create and modify multiple policies, each organization can only have one current policy at a time. The policy is applied to an organization's inventory on an asset by asset basis so that policy rules are reflected on every individual asset.

Figure 47 Policies Dropdown

The screenshot shows the Capital Planning Tool (QA) interface. The top navigation bar includes icons for Home, Assets, Reports, Finance, and Settings. The 'Policies' dropdown menu is open, showing the following options: Policies, Capital Projects, Project Planner, SOGR Capital Project Analyzer, All Audit Results, and Annual Inventory Update Results. An orange arrow points to the 'Policies' option in the dropdown.

Type	Avg. Age	Count
ACTS Revenue Vehicles	3.3	23
ACTS Support Facilities	2.0	1
AMTRAN Revenue Vehicles	11.8	29
AMTRAN Stations/Stops/Terminals	10.6	5
AMTRAN Support Facilities	29.0	5
AMTRAN Support Vehicles	4.6	7
AMTRAN Maintenance Equipment	12.7	211
AMTRAN Facility Equipment	30.5	90
AMTRAN IT Equipment	6.2	84
AMTRAN Office Equipment	14.0	204
AMTRAN Communications Equipment	7.0	61
AMTRAN Signals/Signs	7.0	12
ATA Revenue Vehicles	8.1	104

Clicking “Policies” in the dropdown will display the Policy options that are available. Each individual policy also can be accessed through the submenu navigation options, by hovering over the policies selection in the main navigation dropdown.

Figure 48 Policy Rule Sets

The screenshot shows the Capital Planning Tool (QA) interface. The top navigation bar includes icons for Home, Assets, Reports, Finance, and Settings. The 'Policy Rule Sets' section is displayed, showing two policy options: Asset Replacement/Rehabilitation Policy and TAM Policy. An orange arrow points to the 'TAM Policy' option.

5.1 Asset Replacement/Rehabilitation Policy

Asset Replacement and Rehabilitation Policies can be chosen under the Policies submenu. The SOGR Capital Project Analyzer, Capital Projects, and Project Planner tools apply this policy to determine the estimated service life, replacement cost, and depreciation of an asset. Asset Replacement/Rehabilitation Policy Rules here can be set at the State or individual organization level. This type of policy set will persist from year to year, unless edited or removed.

Update Policy

If you are content with a parent policy and wish to distribute the policy rules through to one or more child organizations, select “Distribute this Policy.” A warning will display, as shown, to inform you that child organizations will need to choose whether to apply this policy.

Figure 55 Distribute Policy

Distribute Policy

Warning!
The parent policy will be distributed to the children policies. After distribution, agencies will need to apply their policies and re-run the SOGR builder. If you would like to apply or build SOGR projects for all agencies at once, please contact Cambridge Systematics.

Run...

Users can create new policies by copying an existing policy. Make a Copy displays the same dialog as Update Policy but once saved, a new policy is created based on the copied policy. When copying a policy, you can set the initial organization wide parameters. For example, Depreciation Calculator can be changed from “straight line” to “declining balance.” The new created Policy is named according to the Description text box shown.

5.2 TAM Policy

TAM Policies are used to set Useful Life Benchmark (ULB), Transit Economic Requirements Model (TERM), and Performance Measure Percent targets for asset categories on an annual basis. The TAM Policy will be used to conduct performance calculations for the NTD A-90 report. Ideally, TAM Policies should be set at the beginning of an NTD Reporting year (e.g., July–June, October–September, or January–December). Organizations can be grouped by a common characteristic, and policies can be distributed through the group.

The first step in the creation of a TAM Policy, is to Add a New Policy Year, followed by creating groups. These initial steps can only be completed on the Group Management tab, which is only accessible by users with the TAM Group Manager or Admin permission.

Figure 69 TAM Policy Group Management

Select a Policy Year that you wish to view and click the “View” button. If a Policy Year does not exist or you need to create a policy for a new year, click the “Add New Policy Year” button and select the TAM Policy year you wish to create. The Period will populate based on individual client reporting period, based on initial system configuration. Below the Policy Year Filter, Group Management is performed on the chosen Policy Year.

Figure 70 TAM Policy Year

If you select the “Add New Policy Year” button, a dialog box will appear and the year selection will default to the next available year. If there are no existing Policy Years, the current year will be available. If there is an existing Policy Year, you will have the option to Copy Groups From Previous Policy Year.

Figure 71 Add New TAM Policy Year

Once a new year has been created or you filtered for an existing year, the Policy Year that you have chosen will display all available groups below. If you have created a new Policy Year, and did not copy from the previous year, you will need to create new groups.

Figure 72 Group Management Period and Year

Once the new group is created, the Status is set to Inactive. You have the option to edit, delete or Generate that Group. Click “Generate” when you are ready to proceed and you will notice that the group Status will change to In Development. Clicking the “Generate” button adds the group to the Group Metrics tab, so the assigned TAM Group Lead can start the process of setting performance measures and editing rules for all organizations within the group. The Group Management tab, is only viewable and editable by users with the TAM Group Manager or Admin permission, and TAM Group Leads who can only access groups to which they have been assigned.

Policy Year: 2021 Period: July - June Group Name: New Group View

Select Policy Year, Group Name and click View

Metrics can be set for each asset category, by selecting the category you wish to edit in the Asset Category dropdown. Assets can be set to locked or editable. Locked assets cannot be changed in the Performance Measures tab for each organization within that group. If you leave any asset as editable, then each organization in that group can modify the metrics within the Performance Measures tab.

Figure 79 Editable and Locked Assets

Asset Category	Group Name	Group Status	Organizations	Copied From Previous Year
Revenue Vehicles	New Group	In Development	View	No

Revenue Vehicles

Percentage of revenue vehicles that exceed the Useful Life Benchmark (ULB)

Asset Class/Type	ULB	Editable/Locked	Goal Pcnt	Editable/Locked
AO-Automobile	8	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable
BU-Bus	14	<input checked="" type="checkbox"/> Editable	0	<input type="checkbox"/> Locked
CU-Cutaway	10	<input type="checkbox"/> Locked	0	<input checked="" type="checkbox"/> Editable
OR-Other	0	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable
SV-Sports Utility Vehicle	8	<input checked="" type="checkbox"/> Editable	0	<input type="checkbox"/> Locked
VN-Van	8	<input type="checkbox"/> Locked	0	<input checked="" type="checkbox"/> Editable

The TAM Policy Group Lead should edit Useful Life Benchmark (ULB), Goal Percent (Goal Pcnt), or other applicable asset metrics as necessary. Fields can be edited by clicking directly on the value in the field, and clicking the checkmark box. Editable/Locked toggles automatically save any changes made.

Figure 80 Asset Type Percentage Settings

Percentage of revenue vehicles that exceed the Useful Life Benchmark (ULB)

Asset Class/Type	ULB	Editable/Locked	Goal Pcnt	Editable/Locked
AO-Automobile	8	<input checked="" type="checkbox"/> Editable	10	<input checked="" type="checkbox"/> Editable
BU-Bus	14	<input checked="" type="checkbox"/> Editable	20	<input checked="" type="checkbox"/> Editable
CU-Cutaway	10	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable
OR-Other	0	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable
SV-Sports Utility Vehicle	8	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable
VN-Van	8	<input checked="" type="checkbox"/> Editable	0	<input checked="" type="checkbox"/> Editable

Orange arrows and boxes highlight the ULB and Goal Pcnt columns, indicating where settings can be edited.

Once completed, click the “Distribute” button to push the group metrics over to the Performance Measures tab for each organization within the group. Each group within a Policy Year can be distributed on an individual basis. If all the Editable/Locked toggles were in a state of “Locked” for every asset within each Asset Category for a group, the status for each organization’s Performance Measures will automatically update to Active status. If at least one Editable/Locked toggle is in a state of “Editable,” each organization will need to manually Activate the metrics on the Performance Measures tab.

6.0 Funding

Organizations can establish and manage different types of Federal, State, and Local Programs.

6.1 Programs

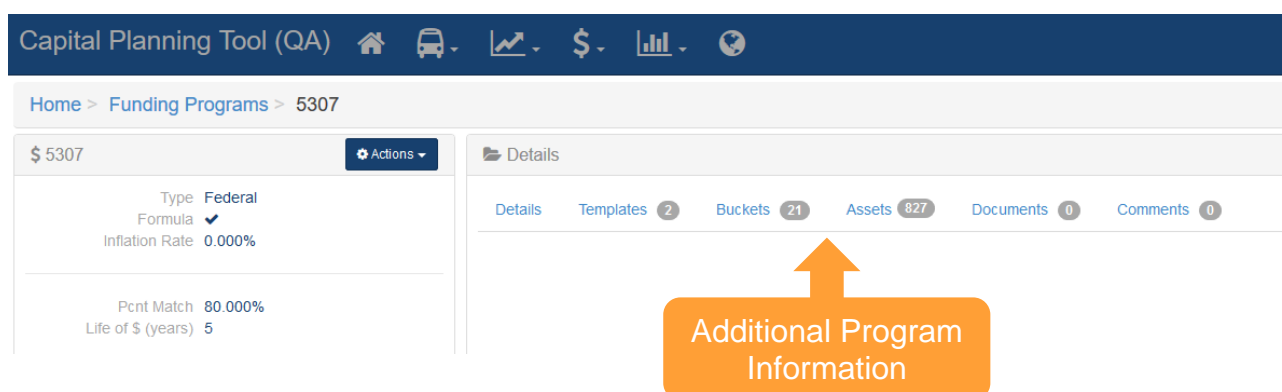

Programs are different types of funding programs which address specific sets of needs and/or objectives. You can see available programs from the Funding dropdown. All funding programs are categorized into an appropriate Source, such as: Federal, State, and Local. New programs can be added by selecting the “Add Funding Program” link.

Figure 87 Available Funding Programs

Clicking on an individual program will give you specific details about that program, like Templates, Buckets, Assets that were funded by the selected program, as well as other pertinent information such as documents, comments, and program details.

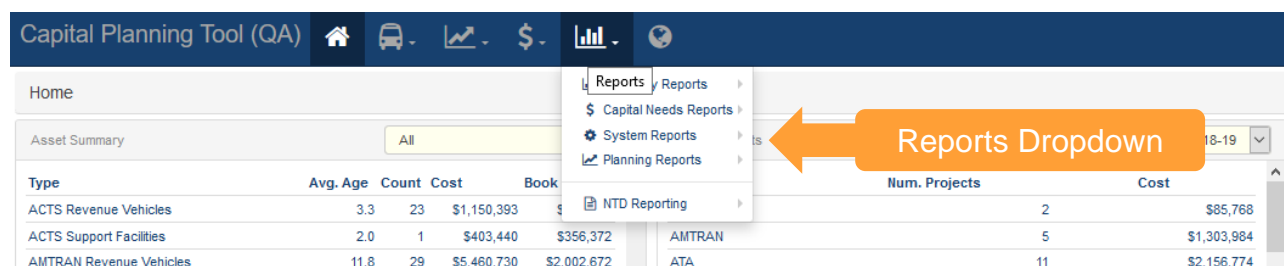

Figure 88 Funding Program Details

7.0 Reports

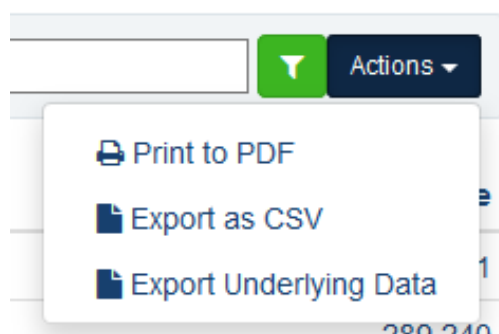

A variety of preconfigured (canned) reports can be generated, ranging in topic areas from Inventory, Capital Needs, System Reports, and Planning.

Figure 89 Reports Dropdown

Reports can be exported into multiple file formats for distribution or further analysis. In the top right corner of each report, look for the Actions menu for available download links.

Figure 90 Report Exports

7.1 Inventory Reports

Inventory reports are a rollup of asset inventory data, including age, condition, and funding related calculations.

Asset Condition Report—The Asset Condition Report displays the count of assets of different types for a range of asset condition ratings (excellent, good, adequate, etc.). The report can filter data by Asset Type.

Figure 91 Asset Condition Report

Asset Age Report—The Asset Age Report displays the count of assets of different types for a range of asset ages (one year old, two years old, etc.). The report can filter data by Asset Type.

Figure 92 Asset Age Report

The Asset Funding Source Report computes for every funding program, organization (agency), and fiscal year, the number of assets that were purchased using a particular funding program as well as the cost associated with that particular funding program. Drill-down functionality allows the user to see the exact lists of assets, and the dollars spent on each asset for that funding source. Multiple filtering options are available, providing the ability to filter by multiple combinations of data:

- Agency, Funding Program.
- Agency, Funding Program, Fiscal Year.
- Funding Program, Agency.
- Funding Program, Agency, Fiscal Year.
- Funding Program, Fiscal Year.
- Funding Program, FY, Agency.
- FY, Funding Program.
- FY, Funding Program, Agency.

Figure 93 Asset Funding Source Report

7.2 Capital Needs Reports

Capital Needs Reports are rollups of information about different asset, projects, ALIs and funding.

The Backlog Report is a list of all system assets associated with individual organizations. The report entails summary data of assets by Subtype, including total count, average replacement cost, and total replacement cost.

Figure 94 Backlog Report

7.3 System Reports

System reports keep track of system-related functional metrics.

The User Login Report keeps track of users, the number of logins made, and the pervious login of each user.

BPT	Bug	2015-06-10 19:20:41 UTC	When exporting vehicle information from the asset inventory to Excel, fields that have a symbol or check mark are blank in excel. For example, I selected 40ft vehicles and selected/deselected columns. When I exported to Excel, the ADA field (which was displayed as check marks in CPT) is blank for each asset.	Microsoft IE 11	Stephen	Panko	9.999.999.999.00	Open		
BPT	Bug	2015-06-12 16:46:05 UTC	On Wednesday June 10th Dana Moyer from STS reached out to me to request help updating the mileages for all of her vehicles. She said the every month they try to update the mileages for all of her vehicles and so I suggested she do a bulk/mass upload to make it easier. However, when we tried to download an inventory template we both were unable to do this (I ran into the "Ooops...there was an error" screen" but I'm not sure what Dana got) Shortly after I got off the phone with Dana I logged in to production and I was able to download the template. However, I haven't been able to get a hold of Dana since our discussion on Wednesday to see if it worked for her. I will keep trying to reach out to her to see if she is able to download the template and do the mass upload thereafter.	Google Chrome	Patrick	Sosik	9.999.999.999.00	Open		
BPT	Bug	2015-06-19 11:42:17 UTC	Jeff Glisson of SCTA is attempting to add assets and getting the "Ooops Error 500 Application Error" From Jeff. "Yesterday and today for a couple of times, I have been unable to use the CPT to add the information on the two minivans. I logged in... clicked on Add Assets under inventory... clicked on Van Asset Type... clicked on Create New Asset... and received the attached error message."	Microsoft IE 11	Kyle	Eckert	717-772-5614	Open		

7.4 Planning Reports

Planning Reports are reports that analyze asset-based data such as state of good repair, asset status, and metrics related to service life goals and performance.

The Vehicle Replacement Report finds and displays summary data for all revenue vehicles that are scheduled to be replaced within a fiscal year.

Figure 97 Vehicle Replacement Report

Capital Planning Tool (QA)										
Home > Reports > Vehicle Replacement Report										
Vehicle Replacement Report										
All Transit Operators										
Fiscal Year	Type	Sub Type	Count	Book Value	Replacement Cost					
FY 18-19	Revenue Vehicles	Bus < 30 FT	472	\$3,681,401	\$34,064,976					
FY 18-19	Revenue Vehicles	Bus 30 FT	18	\$972,478	\$4,088,775					
FY 18-19	Revenue Vehicles	Van	189	\$332,474	\$7,668,659

Totals for FY 17-18			132	\$1,782,025	\$13,471,504

The Asset Service Life Summary Report displays all asset categories, listed by subtype, and calculates the quantity and percentage of assets that are past their Estimated Service Life in month, miles, and the quantity and percentage that have fallen below the TERM threshold as set in the Asset Replacement/Rehabilitation Policy. Data can be filtered by Asset Category, and by a minimum and maximum range in months of assets beyond their Estimated Service Life. A drill-down of data is provided on an organization-level basis, while the table, and the underlying data used to make the calculations can be exported as well.

Asset Service Life Summary Report Asset Type: Revenue Vehicles Months Past ESL Min: 1 Months Past ESL Max: Filter or Export

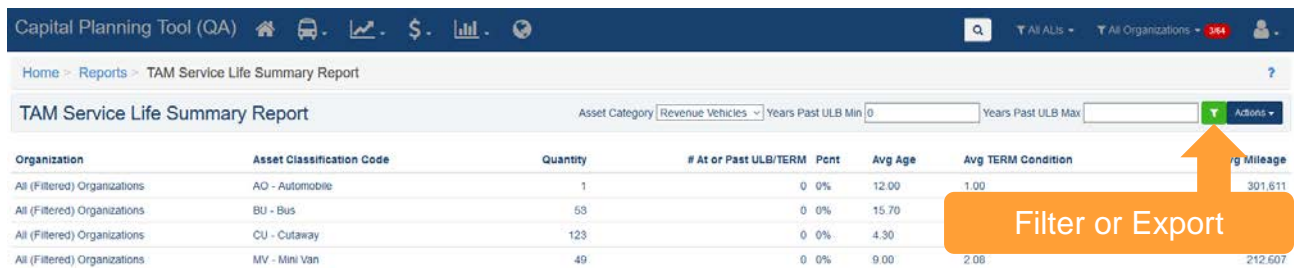

Organization	Subtype	Quantity	# Past ESL (Mo.)	Pcnt	# Past ESL (Mi.)	Pcnt	# Past TERM Thres	Pcnt
All (Filtered) Organizations	Bus < 30 FT	123	55	45%	29	24%		63%
All (Filtered) Organizations	Bus 30 FT	9	6	67%	9	100%		
All (Filtered) Organizations	Bus Commuter/Suburban	14	0	0%	0	0%		

The TAM Service Life Summary Report displays all asset categories, listed by subtype, and calculates the following:

- Revenue Vehicles and Equipment—Service Vehicles: Quantity and percentage that are past their Useful Life Benchmark in months;
- Facilities (Primary): Quantity and percentage of Facilities (Primary) that have fallen below the TERM Policy value; and
- Infrastructure—Track: Linear asset miles of Infrastructure that have Active Performance Restrictions.

The ULB, and TERM values pull from the most recent year of the TAM Policy for each organization that are either in a Pending Activation or Active status. Data can be filtered by Asset Category, and a drill-down of data is provided on an organization-level basis, while the table, and the underlying data used to make the calculations can be exported as well.

All (Filtered) Organizations	MV - Mini Van	49	0	0%	9.00	2.08	212,507

8.0 Specialized Reports

8.1 Asset Fleet Builder

A fleet is a number of vehicles that share the same characteristics. Organizing vehicles into fleets is advantageous because it summarizes rolling stock inventories at a higher level.

The Asset Fleet Builder is a tool specifically designed to assist with the creation of the Revenue Vehicles (A-30), and Service Vehicles (Nonrevenue) (A-35) National Transit Database (NTD) asset reports. Both of these NTD asset forms require data be reported by fleet, and the Asset Fleet Builder provides an interface to auto-create and easily manage both Revenue Vehicle and Service Vehicle (Nonrevenue) fleets.

When building fleets for the first time, you can choose to use the Asset Fleet Builder. The builder analyzes organization inventories and automatically groups assets into fleets based on the unique fleet definitions and sorts those assets into either the Revenue Vehicles or Service Vehicles section. All assets grouped within a fleet will no longer be listed within the Orphaned Assets portion of the Manage Fleets section. When you run the builder, it will function as a background job in the system and notify you once complete in the notifications section. From there, users can review the fleets, add fleet-specific information or manually regroup assets as needed.

You should only use the builder tool the first time you create a fleet, otherwise you will delete existing fleets.

Figure 102 Asset Fleet Builder

The screenshot shows the 'Capital Planning Tool (QA)' interface. At the top, there's a navigation bar with icons for Home, Fleets, Manage Fleets, and others. Below this, the 'Fleets' section is active, showing tabs for 'Revenue Vehicles', 'Support Vehicles', and 'Manage Fleets'. Under 'Manage Fleets', there's a section for 'Orphaned Assets' with various filters like 'Any Asset Type', 'Tag/ID/VIN/Plate', 'Any Mfr...', 'Any Model', 'Year Mtd', 'Any Subtype...', 'Any Vehicle Type', and 'Any Status'. Below the filters is a table with columns: Agency, Asset Type, Asset Tag, External ID, VIN, License Plate, Manufacturer, Model, Year Manufactured, Asset Subtype, FTA Vehicle Type, Status, and Action. The table is currently empty with a 'Loading, please wait' message. Below the table is the 'Asset Fleet Builder' section. It contains a blue box with text: 'The Asset Fleet Builder analyzes your organization's inventory and groups assets into fleets following parameters set by NTD reporting. If you run the asset fleet builder, you will delete all existing fleets and regroup the assets from scratch. Please note that you will lose any existing fleet data. Once the builder has completed, you will receive a notification. Please review your fleets at that time and add fleet specific information.' To the right of this text is an orange arrow pointing to two buttons: 'Build Revenue Vehicles Fleets' and 'Build Support Vehicles Fleets'. A large orange callout box on the left says 'Build Revenue or Support Fleets' with an arrow pointing to the buttons.

Note: Running the Fleet Builder will delete all existing fleet data, if previously run.

Build Revenue or Support Fleets

The Asset Fleet Builder analyzes your organization's inventory and groups assets into fleets following parameters set by NTD reporting. If you run the asset fleet builder, you will delete all existing fleets and regroup the assets from scratch. Please note that you will lose any existing fleet data. Once the builder has completed, you will receive a notification. Please review your fleets at that time and add fleet specific information.

Build Revenue Vehicles Fleets

Build Support Vehicles Fleets

When you add a new asset to the system, the new asset will be added as an Orphaned Asset within the Manage Fleets section.

Figure 103 Asset Fleet Builder—Orphaned Assets

The screenshot shows the 'Capital Planning Tool (QA)' interface. At the top, there's a navigation bar with icons for home, fleet, revenue, support, and manage. Below this, the 'Fleets' section is active, with tabs for 'Revenue Vehicles', 'Support Vehicles', and 'Manage Fleets'. The 'Manage Fleets' tab is selected, and an orange arrow points to it with the text 'Manage Fleets'. Below the tabs, there's a section for 'Orphaned Assets' with a table of assets. The table has columns for Agency, Asset Type, Tag, ID, VIN, License Plate, Manufacturer, Model, Year Manufactured, Asset Subtype, FTA Vehicle Type, Status, and Action. An orange arrow points to the 'Add to Fleet' button in the 'Action' column of the table, with the text 'Add Asset to Fleet'.

Agency	Asset Type	Tag	ID	VIN	License Plate	Manufacturer	Model	Year Manufactured	Asset Subtype	FTA Vehicle Type	Status	Action
CAT	Revenue Vehicles	#1701		15GGB2713H3189913	-	GIL-Gill Corporation	35' Low Floor	2017	Bus Std 35 FT	BU-Bus	In Service	+ Add to Fleet
CAT	Revenue Vehicles	#271	PT Bus #271	1FDFE4FS8HDC18987	-	FRD-Ford Motor Corporation	Champion				In Service	+ Add to Fleet
CAT	Revenue Vehicles	#272	PT Bus #272	1FDFE4FS8HDC18988	-	FRD-Ford Motor Corporation	Champion				In Service	+ Add to Fleet
CAT	Revenue Vehicles	#273	PT Bus #273	1FDFE4FSXHDC18992	-	FRD-Ford Motor Corporation	Champion	2017	Bus < 30 FT	CU-Cutaway	In Service	+ Add to Fleet

Selecting “Add to Fleet” on the right allows users to add assets to a current fleet or create a new fleet, and will limit options of existing fleets only if all shared characteristics match. Clicking “Save” will either add to an existing fleet, or create a new fleet, depending on what you choose, and allow you to specify details about that fleet.

Figure 104 Adding an Orphaned Asset to a Fleet

The screenshot shows a modal dialog box titled 'Orphaned Asset'. It has two main sections: 'Add to Existing Fleet' and 'Create New Fleet'. The 'Add to Existing Fleet' section contains the text 'There are no fleets in the system that match this asset'. The 'Create New Fleet' section contains the text 'Click Save to create a new fleet based on this vehicle'. At the bottom of the dialog, there are two buttons: 'Save' and 'Cancel'.

When you add the asset to a new fleet, if you wish to update fleet-specific details, look for the actions button, and click “Update this Fleet” to add details. Users also can remove the fleet completely, at which point all fleet assets will return to the Orphaned Assets portion of the Manage Fleets section. Users also can edit other fleet and asset-specific data such as NTD ID, asset odometer readings, and remove or add assets to the fleet from directly within the fleet.

8.2 NTD Asset Reports

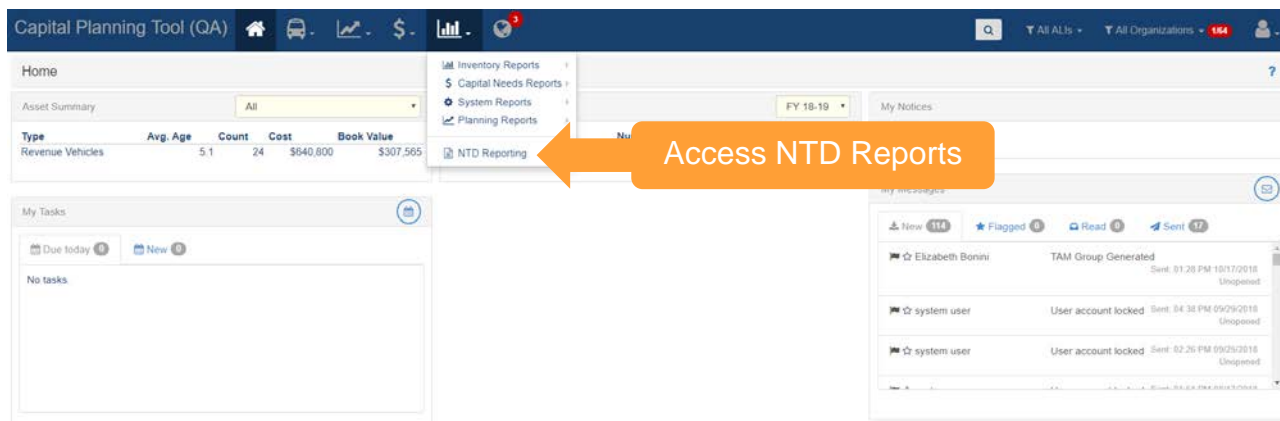

The NTD Asset Reports are forms that must be submitted on an annual basis for every organization that receives Federal public transit funding. Required forms differ between organization, based on the category of assets in operation for each organization. The specific forms are as follows:

- Facilities (A-15) — Pulls asset data for primary facilities.
- Infrastructure (A-20) — Pulls asset data for infrastructure assets, and produces a separate report for each Primary Mode/Type of Service unique combination.
- Revenue Vehicles (A-30) — Pulls asset data for revenue vehicles, which are included as part of a fleet.
- Service Vehicles (Non-revenue) (A-35) — Pulls asset data for Service Vehicle (Non-Revenue), which are included as part of a fleet.

- Performance Measure Targets (A-90) — Pulls ULB, TERM value, and goal percentages for the TAM Policy associated with the corresponding NTD Report year, and calculates performance.

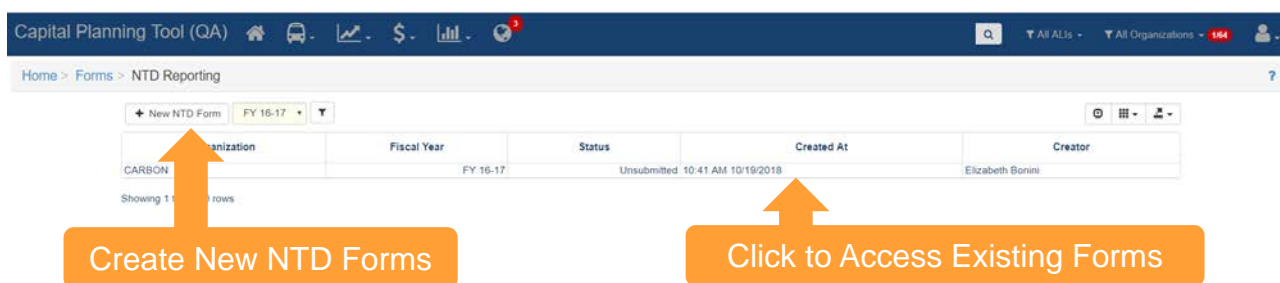

Each report pulls and calculates data according to the reporting year selected, and the activities associated with the system reporting period, i.e., July—June, October—September, or January—December.

Figure 109 Access NTD Reports

Any NTD reports that have been previously generated can be viewed on the initial report table available when clicking on the NTD Reports module. Existing report data can be accessed by clicking on the row for an individual organization upon which point it can be downloaded, submitted for review, have comments added, updated, or removed. New reports can be generated by clicking on the New NTD Form button.

Figure 110 Table of Previously Generated NTD Reports

When you click on the “New NTD Form” button, you will be prompted to select an organization, reporting year, and enter other user-specific information. Upon clicking “Save NTD Form”, you will be directed to the newly created NTD Details and Data page.

9.0 Admin Tools

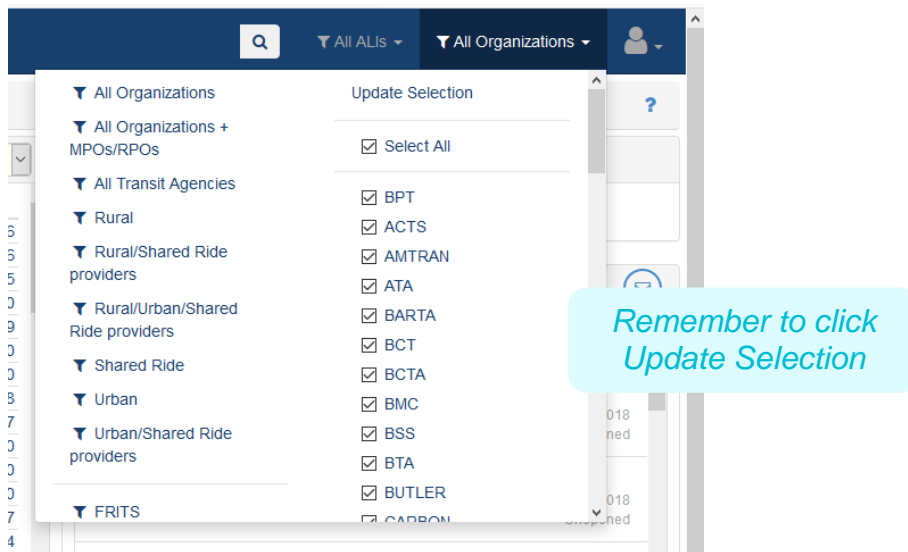

As an administrator, you have access to additional functionality within the User and Organization options at the top right of the screen.

Figure 114 Admin User and Organization Options

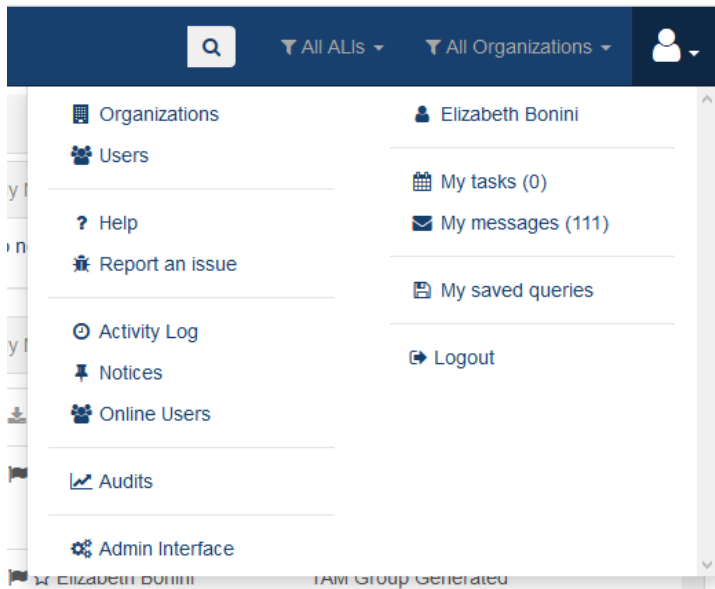

Clicking “All Organizations” provides a filter to pare down the different agencies you see. This also greatly reduces the time it takes to process certain content-rich pages.

Figure 115 Organizations

In your User Options, you'll also see some common elements with other users (though they have been revamped for admins) and some additional functionality.

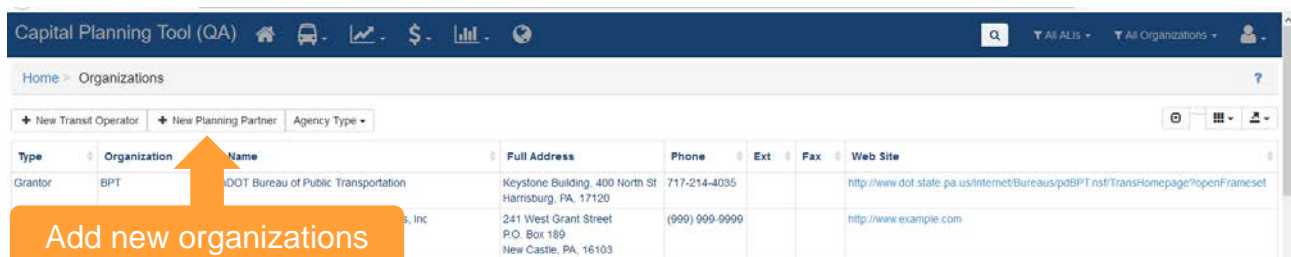

Figure 116 Admin User Options

9.1 Organizations

The organizations page provides an overview of each organization, its type, and an interface for adding new agencies.

Take care about who you grant admin privileges—they'll be able to modify anything

Click Add a notice to create a new one. You can specify temporal and organization parameters.

Figure 122 Add a Notice

The screenshot shows the 'New Notice' form. It includes a dark blue header with navigation icons and a search bar. The form itself is white with yellow input fields. It has sections for 'Subject', 'Summary', and 'Details'. Below these are dropdown menus for 'Organization' (set to 'All'), 'Start Displaying' (date: 07/20/2018, time: 12:00 PM), 'Stop Displaying' (date: 07/20/2018, time: 11:00 PM), and 'Notice Type' (set to 'System Notice'). A 'Create Notice' button is at the bottom.

Once a notice is created, it will display on the dashboard according to the parameters set.

Figure 123 Notice on the Dashboard

The screenshot shows the dashboard interface. At the top is a dark blue header with a search bar, filters for 'All ALIs' and 'All Organizations', and a user profile icon. Below the header is a light gray sidebar with a list of numbers (9, 536, 786, 775, 280, 222). The main content area has a 'My Notices' section with a red warning icon and the text 'test'. To the right of the icon is the timestamp '12:00 AM 07/20/2018' and a 'Details...' link. Below the notice is a 'My Messages' section with an envelope icon.

9.4 Online Users

Administrators can see active user sessions and details about those logins, by accessing the Users link within the User Menu.

9.5 Admin Interface

The Admin Interface is a graphic representation of some of the databases used within the system. From here, you can adjust the content that is displayed in the various interfaces. For instance, you can adjust what capital project types are displayed in the dropdown when adding a new capital project.

Be very careful when modifying or deleting any of the information in the admin interface, as much of the system functionality resides within the Admin Interface, and any changes made may cause systemwide data inaccuracies. Always consult your primary Cambridge Systematics (CS) point of contact should you wish to make modifications to the admin interface, or are unsure of how to perform a specific function.

Figure 125 Admin Interface
