1.0 Welcome!

TransAM is an asset management system designed to support the needs of State DOTs, Planning Agencies, and Transit Agencies. The system manages assets of all types, including revenue vehicles, equipment, facilities, and infrastructure. The system stores crucial information about every asset category and maintains a complete history of the asset as it ages, including; changes in condition, usage, value/depreciation, and other lifecycle events are, that are recorded and can be reviewed at any time. A variety of reports can be generated on asset condition, value, and capital replacement needs.

TransAM, an open-source asset management platform developed by Cambridge Systematics. TransAM focuses on transit assets and project planning, and is designed to make it easier for State DOTs, Planning Agencies, and Transit Agencies to share and exchange information related to assets, projects, and funding.

1.1 Initial Log In and Password Reset

If this is your first time logging in, you should receive an email following the creation of your user account, with a link instructing you to reset your password. Click the link in the email and you will be directed to enter your email address in order to reset your password; enter your email address and click the “Send me reset password instructions” button. If you are an existing user and you forgot your password, you will be taken to the same screen by clicking on the “Forgot Your Password” link on the login page.

Figure 1 Password Reset Request Screen

TransAM OCPD

Instructions

Enter your email address that you use to login to TransAM and click the button. If your email address is found in the system you will get an email with instructions for resetting your password. If you don't receive an email in a few minutes contact your program manager.

Forgot Password

Email

Send me reset password instructions

The email address you enter, must match the email address entered when your account was established

Once you receive your “Reset Password Instructions” email, click on the “Change my password” link within the email, you will be redirected to the system site in your web browser, and you will be prompted to enter your new password twice. Once you enter your password twice, if it meets the password requirements, you will be automatically logged in.

Figure 2 Set/Reset Password Screen

TransAM OCPD

Instructions

Your password must conform to the following:

- At least 8 characters
- Contain at least one upper case and one lower case letter
- Contain at least one number

Change Your Password

New password

Confirm your new password

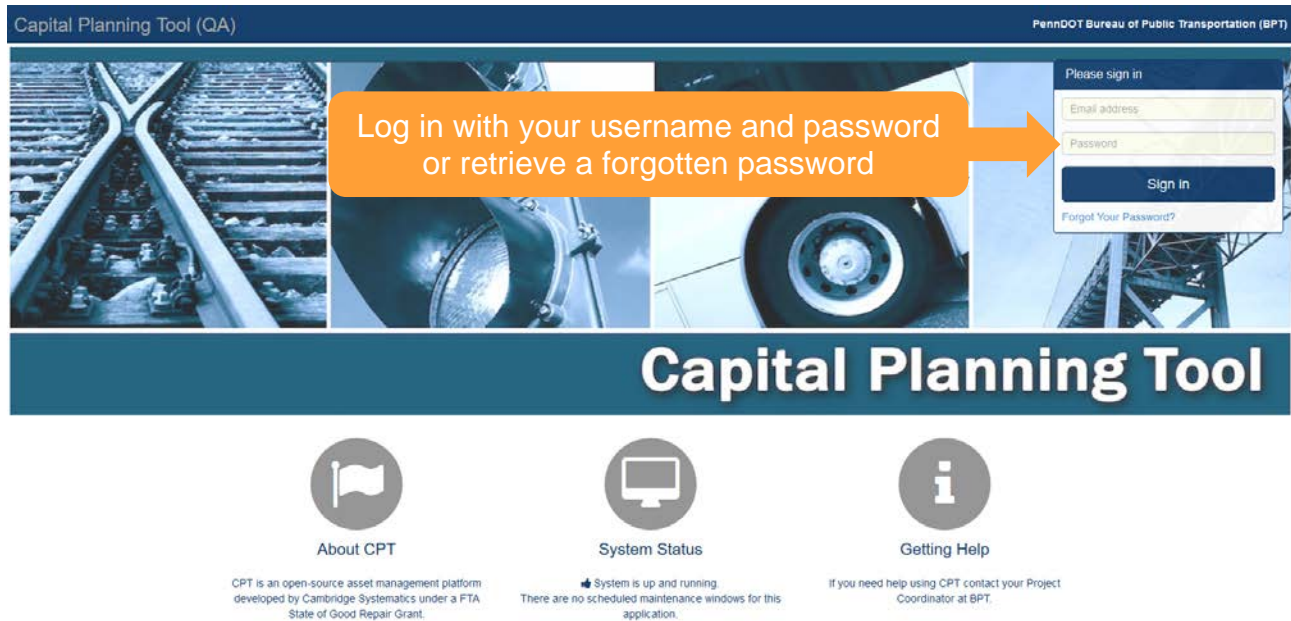

Change my password

1.2 Ongoing Site Access

The system can be accessed via the following URL: <https://transam-drpt.camsys-apps.com>.

Ongoing access can be obtained by bookmarking the site URL in your web browser and clicking on the link, upon which you'll be greeted with a login screen. Enter your credentials in the appropriate fields to login. You also can request a password reset by pressing the "Forgot Your Password?" button.

Figure 3 Login Screen

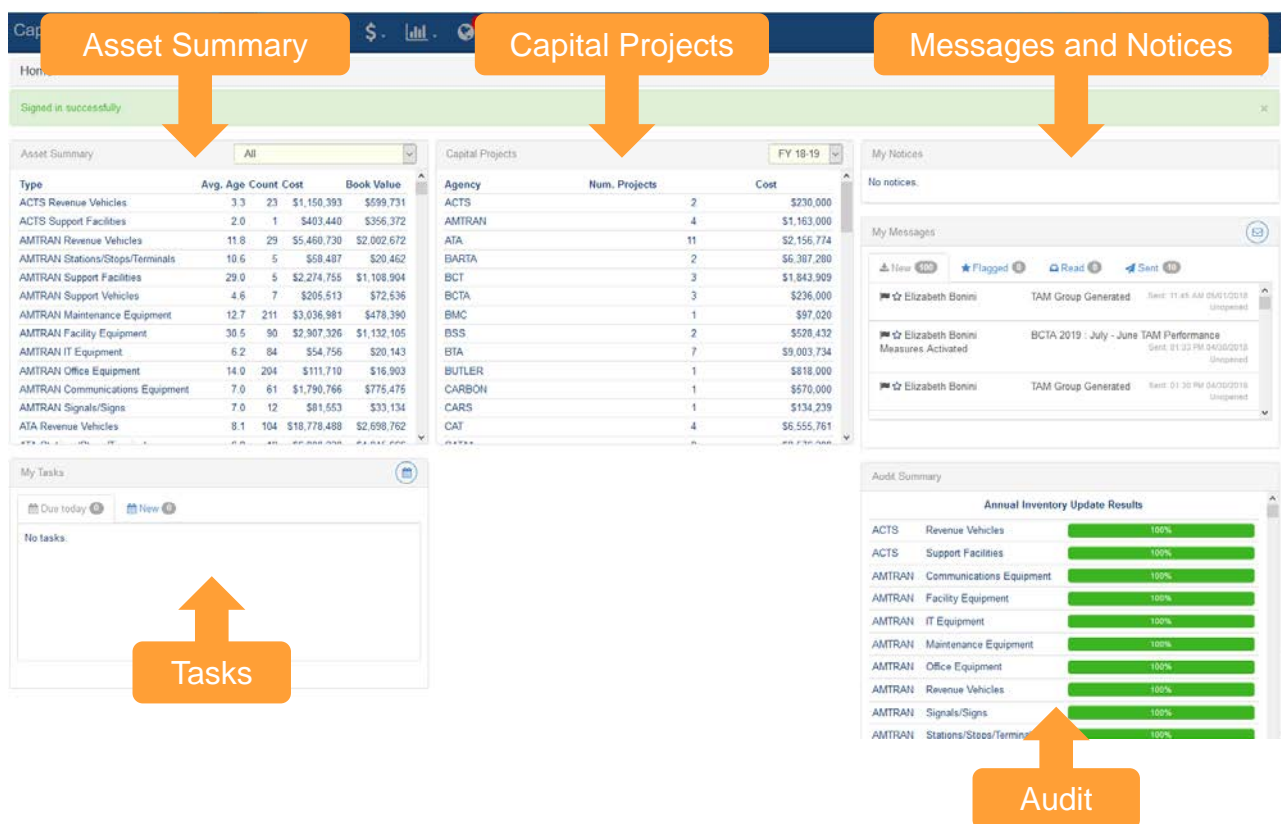

2.0 Dashboard

2.1 Dashboard Elements

Once you're logged in, your first experience will be the dashboard. The dashboard has a variety of elements.

The dashboard widgets highlighted below are: Asset Summary, Capital Projects, My Notices, My Messages, My Tasks, and Audit Summary. These provide a quick glance at the contents within the system.

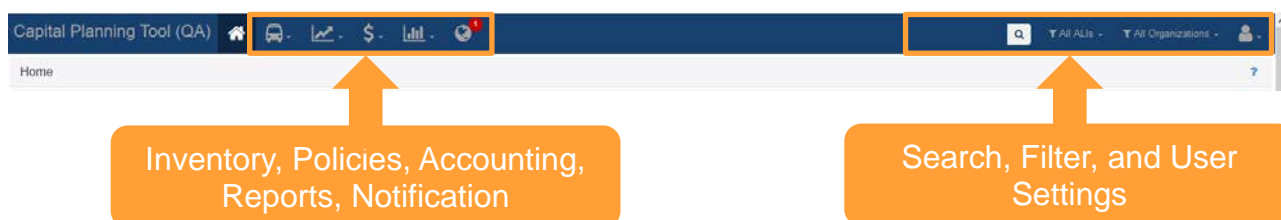

Figure 4 Dashboard Elements

2.2 Header Menu and Controls

The menu icons at the top guide you to the deeper content pages within the system: Inventory, Policies, Accounting, Reports, and Notifications. There also are controls to search, filter Activity Line Items (ALI) or organizations, and user settings.

Figure 5 Header Menu

3.0 General Features and Tools

As you progress through the system, there are some common interface elements that you'll encounter often.

3.1 Table Controls

There are lots of tables inside the system. The tables have common control tools that allow you to manipulate the table contents and export the table.

On header elements, you'll notice two arrows to the right of each column. These controls sort the table ascending or descending based on this column.

Figure 6 **Sorting Controls**

The Export All button to the top right of the table exports all table elements into an Excel table.

Figure 7 **Export Button**

There also are a set of tools to the top right of the table. The left button either displays the table with pagination (e.g., the table shows only a configurable number of rows per page), or the entire table.

The center button allows the user to show or hide different columns. Check marks next to the column indicate if a column will be shown and allow the user to toggle the column on or off.

The right button exports the current table view (complete with filters and excluding hidden elements) into a.CSV,.TXT, or an.XLSX (Excel) file format.

Figure 8 **Table Tools**

3.2 Site Filters

Throughout the site, there are various opportunities to filter data. When you see the following icon it means you can pare down displayed data with a filter.

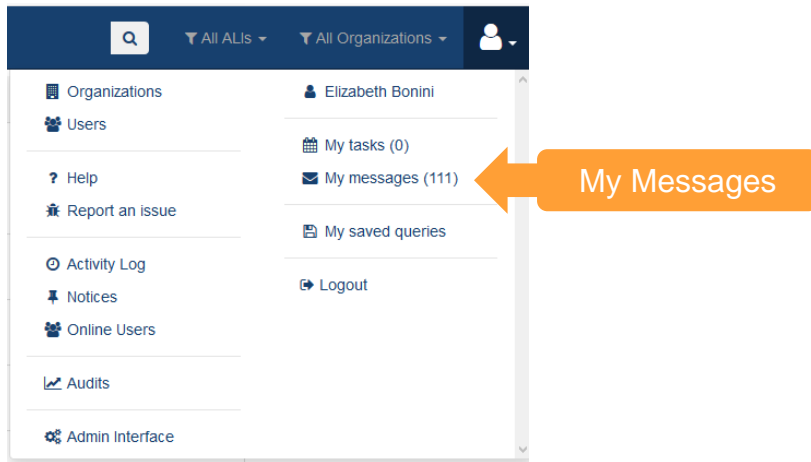

Figure 9 **Filter Icon**

3.3 Messages

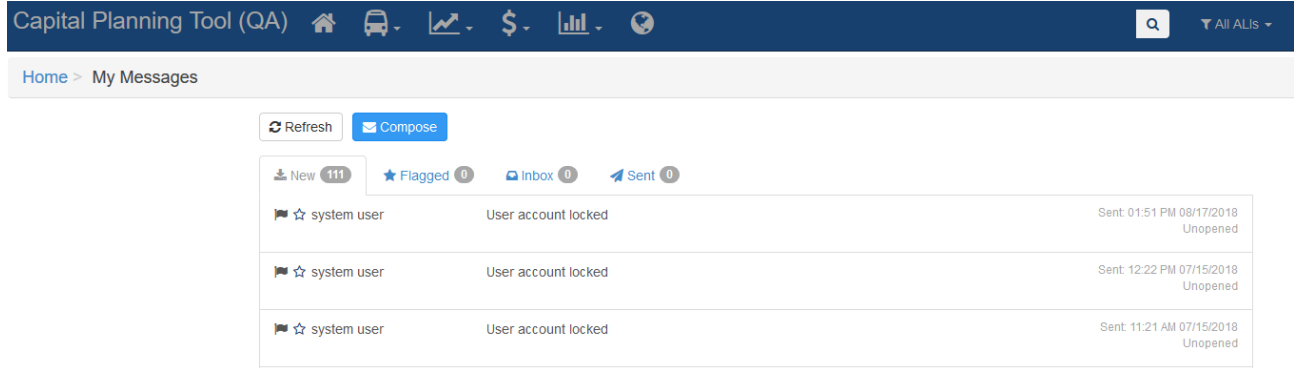

You can access Messages through the User Profile drop down menu.

Figure 10 **User Profile**
Messages

Users are able to send and receive messages to one or more users through the interface.

Figure 11 **Messages**

Selecting Compose will allow you to create a new message. Recipients options will be a list of users in your organization. You can enter the Subject and choose Low, Normal, or High Priority for the message. Type the intended message into the Message Body and press “Send...” when complete.

Figure 12 Message Interface

3.4 Activity Line Item (ALI) Filter

The Activity Line Item (ALI) Filter allows you to pare down on which types of individual funding requests (what are categorized by ALI code) within projects that you can view. This filter only applies to Sections 6 and 7 of this document (Projects and Project Planning).

Figure 13 ALI Filter

You can filter with prepopulated selections or create your own filters.

Figure 14 ALI Filters

To create a new filter, select “New Filter” and specify the details required.

Figure 15 New ALI Filter

3.5 Organizations Filter

If you have oversight of several organizations, you can limit your scope down to certain organizations, in order to only view organization-specific data across the system.

Figure 16 Organization Filter

After you select the organizations you desire, make sure to click Update Selection at the top of the dropdown menu.

Figure 17 Organization Filter Selections

3.6 Search

The system includes a sitewide search feature. It can be found in the top center-right of each page. Click the magnifying glass icon and enter keywords to search sitewide for content.

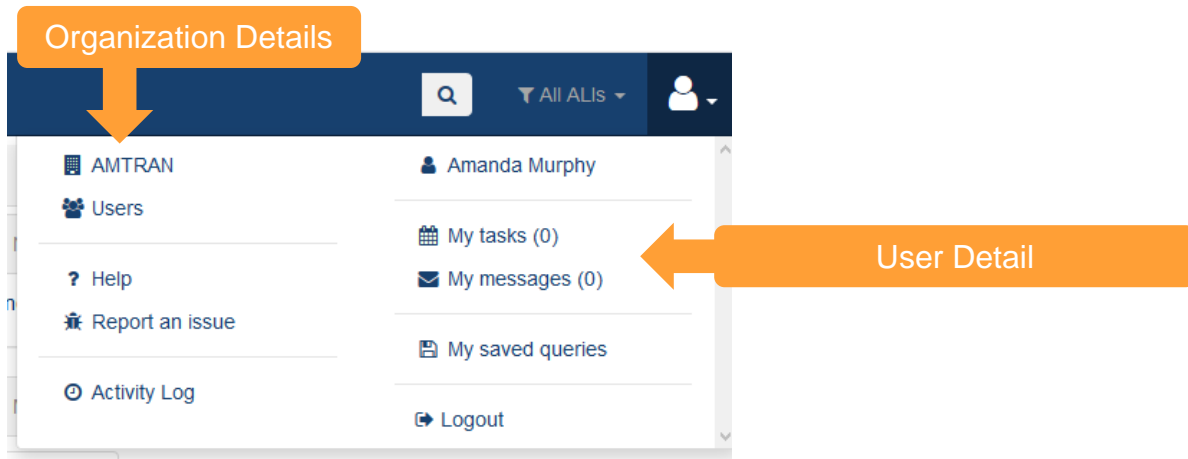

Figure 18 Search Box

3.7 User and Organization Options

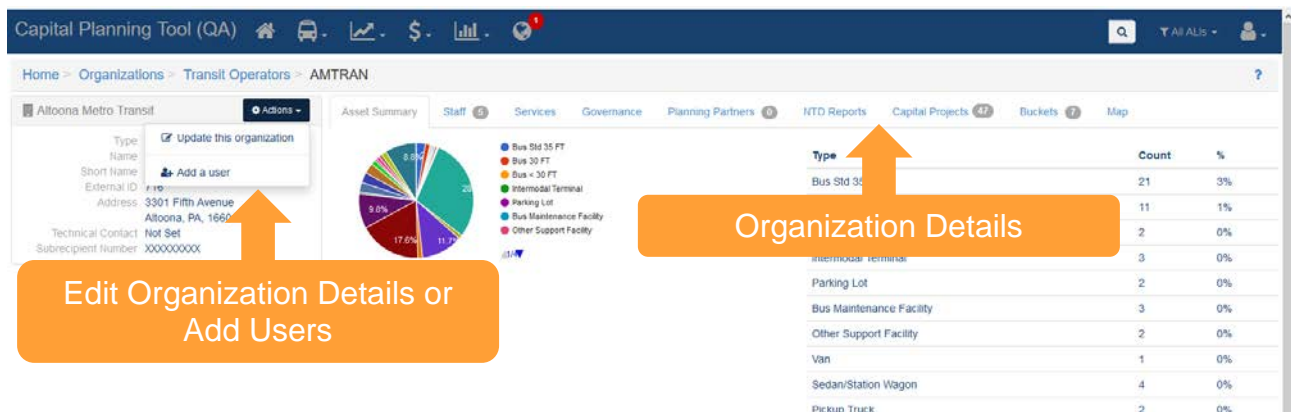

Each user has a menu with personal, organizational, and heads-up information at the top right of the screen.

Figure 19 User Menu

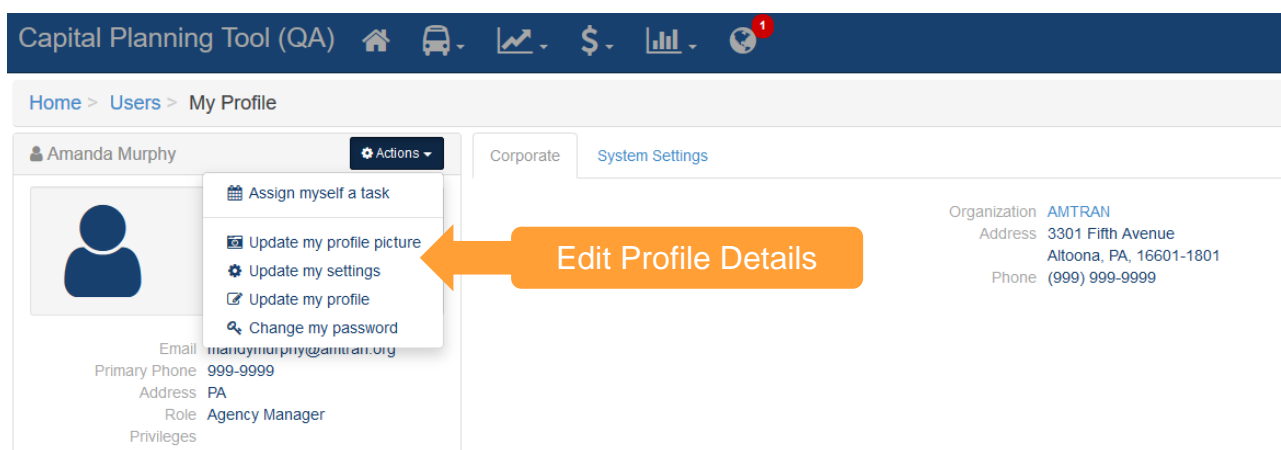

From here, users can explore information about their own organization and their coworkers in the Organization and Users section.

Figure 20 User Menu Dropdown

Clicking on your organization name, will allow you to view and edit organization-specific information, and perform certain functions such as adding users.

Figure 21 Organization Details

If you click your own name, you can see details about your profile and edit them. You also can assign yourself a task to complete.

Figure 22 Profile Details

You can browse this help document or submit an issue in the Help and Report an issue section. Reporting an issue is easy—just fill out the required information with as much detail as you can provide.

Figure 23 Report an Issue

Report an Issue

Use this form to make comments, suggestions for enhancement, or report any issues you may be having with CPT. For example,

- Make a suggestion about how we can make CPT better
- Report a bug that you are experiencing
- Suggest future enhancements that we could make

To track down and fix bugs it is helpful if we know what type of web browser you are using particularly if you are using a Microsoft browser. You can usually find this information by selecting the **About** menu item from your browser. If you don't know what browser you are using select **Unknown**.

Any information provided will be reviewed by a product manager and someone may get in touch with you to discuss your comments.

* Issue Type

* Web Browser Type

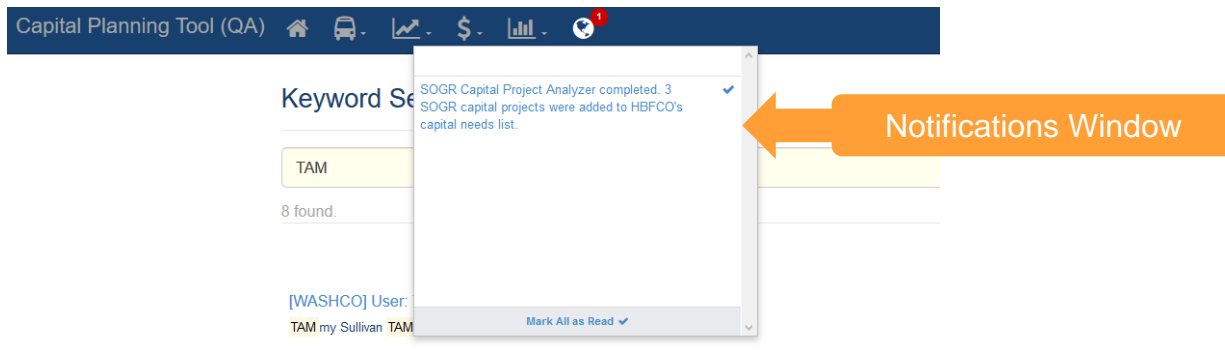

* Comments

Please provide as much detail as you can...

Create Issue

3.8 Notifications

The notifications dropdown alerts you when there's activity in the system that you should be aware of. The globe at the top of the page will display a number with the count of "unread" notifications since your last check. Clicking on a notification item will take you to the change and mark the notification as read. You also can click individual checkmarks to dismiss individual notifications or "Mark All as Read" to quickly dismiss all notifications.

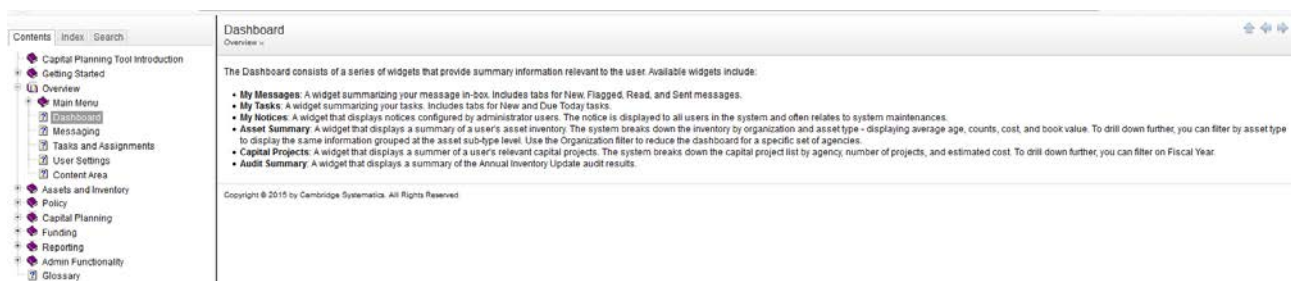

Figure 24 Notification Drawer

3.9 Help

At the top right of each page is a “?” icon.

Figure 25 Help Icon

Clicking the help icon will bring you to the help content regarding that page. The help content provides detailed descriptions of each of the page elements. You also can navigate to help content for other pages. Via the contents, index, or search tabs in the left pane.

Figure 26 Help Content

4.0 Asset Inventory

Management of organization assets is carried out through the Asset Inventory dropdown menu. It contains a variety of tools and functions that streamline asset management.

Figure 27 Asset Inventory Dropdown

4.1 Add an Asset

Adding new assets to the asset inventory is simple. First select "Add Asset" from the Asset Inventory dropdown.

Figure 28 Adding an Asset

Select an Organization and an Asset Class, then click “Create New Asset.”

Figure 29 Select the Organization and Asset ClassA screenshot of a web application interface. At the top is a dark blue header bar with the text "Capital Planning Tool (QA)" and several icons: a home icon, a bus icon, a line graph icon, a dollar sign icon, a bar chart icon, and a globe icon. Below the header is a light gray breadcrumb trail showing "Home > Add Asset". The main content area is titled "New Asset" and contains two dropdown menus. The first is labeled "* Organization" and has a yellow background with the text "Select organization...". The second is labeled "* FTA Asset Class" and also has a yellow background with the text "Select asset class...". Below these two dropdowns is a dark blue button with the text "Create New Asset" in white.

You'll then be directed to fill out all required fields, as depicted on the required tab, and the option of filling out any optional fields on the recommended tab.

4.2 Accessing Existing Assets

Every asset is categorized by category (e.g., Revenue Vehicles, Equipment), class (e.g., Buses (Rubber Tire Vehicles, Rail Cars), type (e.g., BU-Bus, RL-Commuter Rail Locomotive), and a subtype (e.g., Bus Std 40 FT, Bus Articulated) as part of a standardized hierarchy. The asset category, class, type, and subtype relationship is the taxonomy that defines your inventory and dictates the attributes or data fields that exist for

assets. The list of available category, class, and type options are standardized across the system, while subtype options and some data fields have been specifically configured for your specific system deployment.

Clicking on an asset class will drill down on the assets an organization possesses within that particular category and class.

When you access the specific asset record, users can view the highlights section. The highlights sections contains asset summary information such as: a history log, location information, asset charts, asset value information, associated capital projects, and audit results. In addition, tasks, comments, documents, and photos can all be viewed, updated, and edited.

Figure 34 Asset Record: Highlights

In addition to accessing asset highlight information, users can view profile or summary data for that asset.

Figure 35 Asset Record: Profile and Summary

4.3 Editing or Updating Existing Asset Profile Data

Editing asset profile data allows users to modify core attributes that are not expected to change, but corrections may be necessary from time to time. Profile data can be modified by clicking on the field, editing the data, and clicking the check mark; clicking the "X" or clicking outside the field will result in any changes not being saved.

4.4 Updating Existing Asset Lifecycle Data

Asset lifecycle-related information can be edited, updated, changed, or deleted from the action menu in the top right of the screen.

Updating an asset will allow changes to attributes that are expected over the lifecycle of an asset. Asset details such as replacement status, mileage, etc. are expected to be updated periodically. Other actions should only need to happen one time during the life of an asset, such as requesting early or final disposition of an asset.

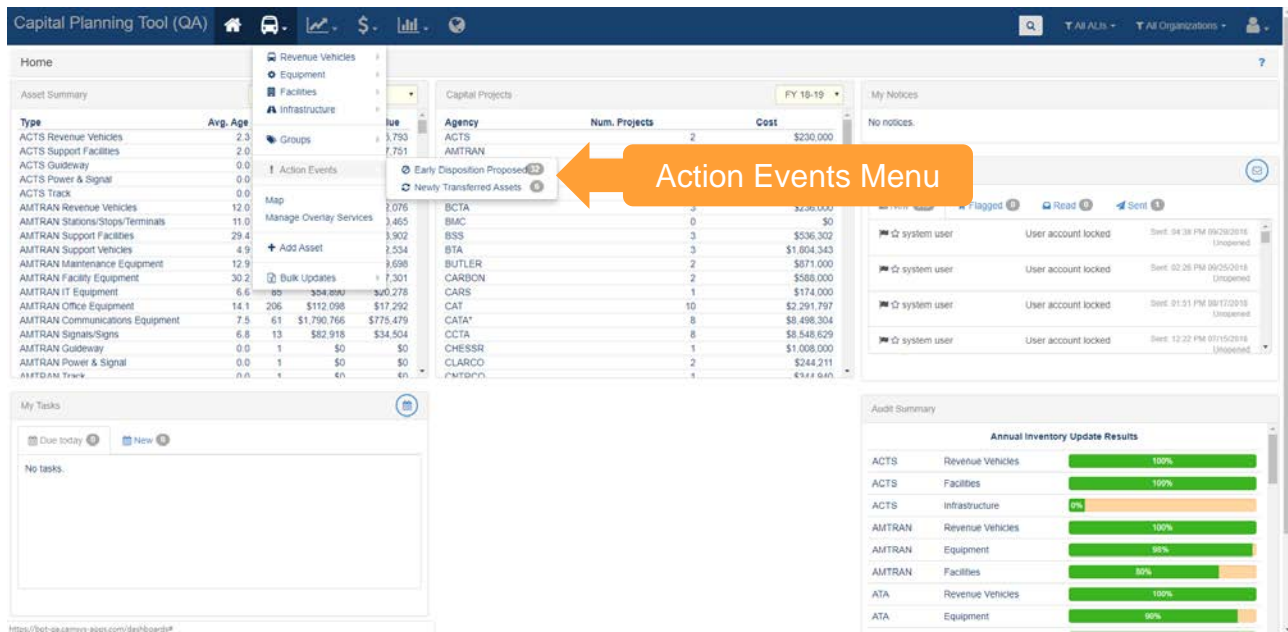

Removing an asset will permanently delete the asset and should be used only when absolutely necessary. This may option may only be available at certain permission levels.

Figure 37 Updating the Lifecycle of an Existing Asset

4.5 Action Events (Disposition and Transfer Review)

During an asset's service life, it is possible that the asset might be sold, reprovisioned, traded in, or transferred. As a result, a special event exists to record relevant information, and review any disposition requests that may be submitted, in order to complete the disposition effort.

Action Events depend on the disposition of an asset to perform certain functions. The available functions will vary depending on individual permissions and organizational policy. Action Events occur when an asset is proposed for an early disposition or an asset is newly transferred. You can submit a request for early disposition from the action menu on an asset.

Figure 38 Asset Action Events (Disposition and Transfer)

An early disposition instance is where a vehicle fails to fulfill its expected life span. The real world is messy and sometimes mishaps such as accidents occur. Under these circumstances, the asset might require disposition before originally intended.

Record final disposition will keep a record of an asset's existence when it is no longer in service. This option will essentially archive an asset so that the history exists, but the asset is no longer considered in the pool of operational assets for an organization.

Early disposition requests can be reviewed from the Early Disposition Proposed page. Select the check box next to an asset, then select the button to Approve or Reject a proposed early disposition.

Figure 39 Early Disposition Requests

4.6 Adding or Updating Assets by Bulk Update

Bulk updates are a faster way to create and edit asset inventories when working with large quantities of asset data. This tool allows users to update service status, condition and mileage of existing inventory, record the last maintenance performed for assets, and identify assets that are going to be reprovisioned or disposed in this planning cycle using their favorite spreadsheet software externally.

Figure 40 Bulk Updates

Selecting “Bulk Updates” allows you to Create a new Template, Upload a Template, or see the status of an uploaded template. The main screen also shows previous bulk updates, their content, uploader, status, and stats about the contents of that update and the upload process.

Figure 41 Bulk Update Tools

Capital Planning Tool (QA)      							
Home > Bulk Updates							
<div>  Create a new Template  Upload a Template Filter Status ▾ </div>							
Agency	File Name	Content	Loaded By	Status	Num Rows Processed	Num Rows Added	
PIKECO	pikeco_transit_inventory_updates_file_handler_2018-04-17.xlsx	Inventory Updates	Toni Marino	Complete	30		
END		Inventory Updates	BETHANY JONES	Complete	84		
WBT	IT_EQUIPMENT_UPDATE.xlsx	Inventory Updates	BETHANY JONES	Complete	84		

The first step to a bulk update is Creating a Template. Click “Create a new Template”, then select your Template Type, Organization, and Asset Class, then select “Create Template.”

Head back to the Bulk Updates page and at the top select “Upload a Template.” Select the parameters on the right that were used to create the template and then click browse and find your edited spreadsheet. Then click Upload spreadsheet.

Figure 45 Bulk Update Upload

Capital Planning Tool (QA)

Home > Bulk Updates > New Template

Bulk Updates

Use this form to upload spreadsheets that you have downloaded from CPT and completed. The spreadsheets can contain either:

- Life Cycle Updates for existing inventory
- Disposition updates for existing inventory

Make sure to select the right type of content before uploading the file.

If you force the update, be aware that this might overwrite and change existing data that CANNOT be undone.

Once the file has been uploaded it will be processed by CPT and the inventory updated which might take a few minutes. You can check the progress by clicking on the file name in the table.

Spreadsheet

Spreadsheet Content

Inventory Updates

CATA*-Centre Area Transportation Authority

Spreadsheet

Browse... cata_transit_inventory_updates_file_handler_2018-06-13.xlsx

Select a spreadsheet that has been downloaded from CPT, edited, then saved

Upload spreadsheet

Select the parameters again and upload spreadsheet

If your file uploads successfully, the main Bulk Update screen should reappear with a “File was successfully uploaded banner” and you should see the most recent update appear at the top of the bulk update history. The system will perform the updates and a new notification will appear in your notification tray once all updates are complete.

Figure 46 Bulk Upload Processing

Capital Planning Tool (QA)

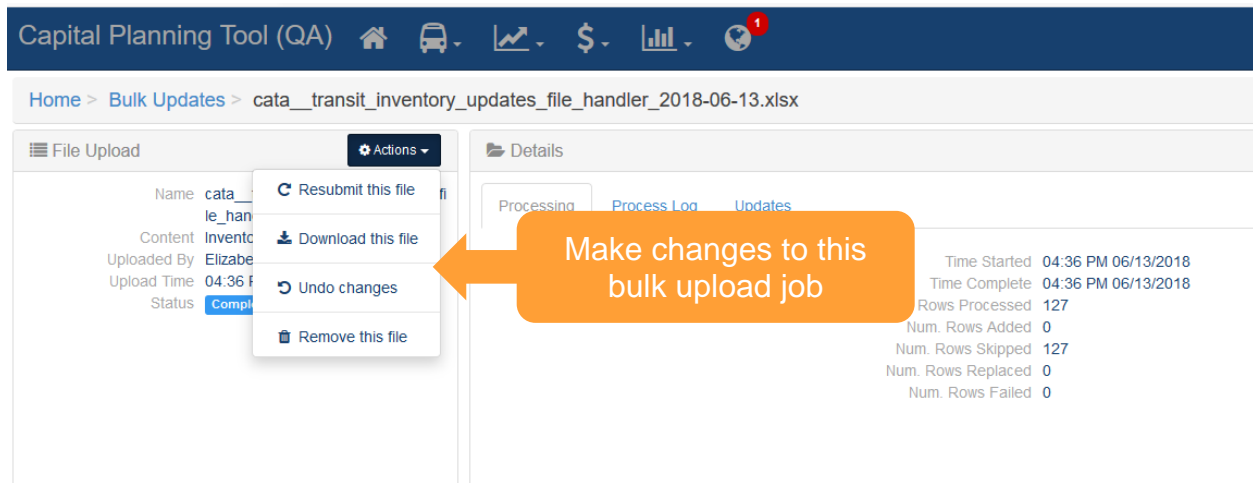

Home > Bulk Updates

File was successfully uploaded.

Create a new Template Upload a Template Filter Status

Agency	File Name	Content	Loaded By	Status	Num Rows Processed	Num Rows Added	Num Rows Failed	Processing Time
CATA*	cata_transit_inventory_updates_file_handler_2018-06-13.xlsx	Inventory Updates	Elizabeth Bonini	Unprocessed				0s
PIKECO	pikeco_transit_inventory_updates_file_handler_2018-04-17.xlsx	Inventory Updates	Toni Marino	Complete	30	25	0	2s

Each row in the Bulk Update table contains additional information and options if you click that update. Use this interface to identify any issues that might have occurred during the bulk upload process. From the actions menu, you can resubmit the file for processing, download that specific spreadsheet again, revert the changes made by this update, or remove the file used to update from the list.

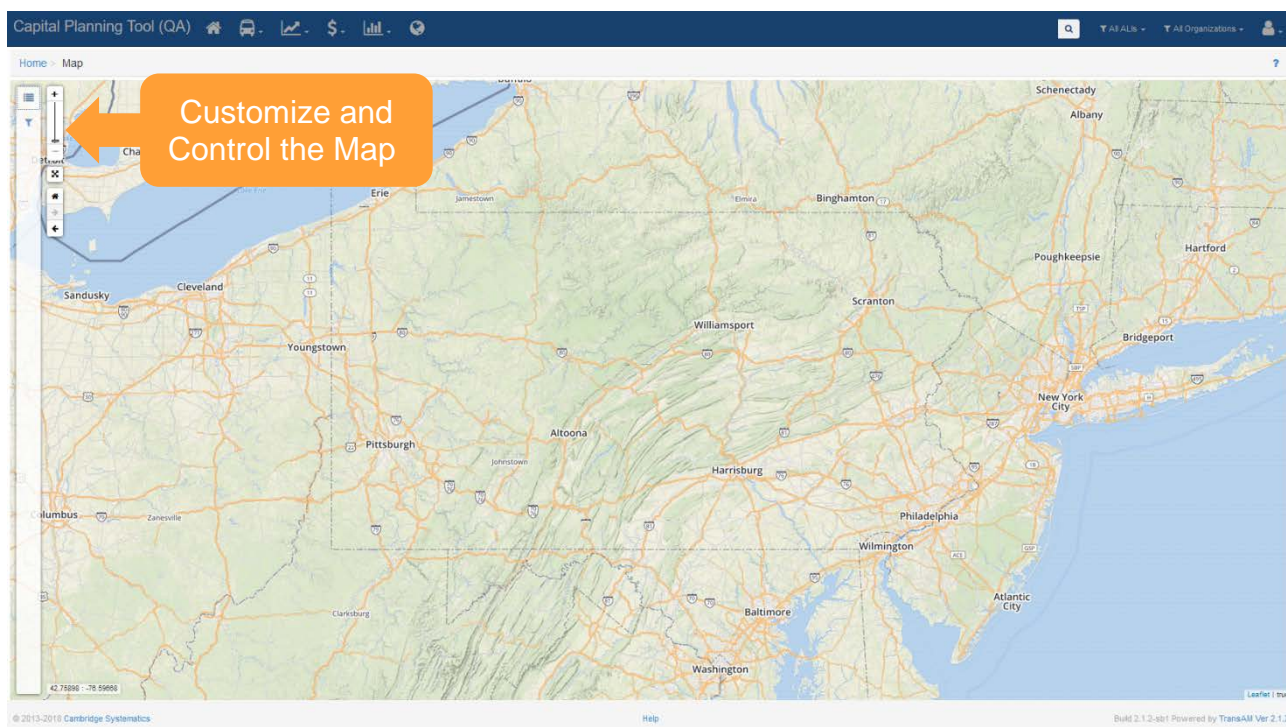

Figure 47 Bulk Update Edit

4.7 Map

The system provides the ability to overlay asset locations on a map.

Figure 48 Asset Map

The map has several key features. You can customize the map from the two icons in the bar on the left of the map.

Figure 49 Map Customization

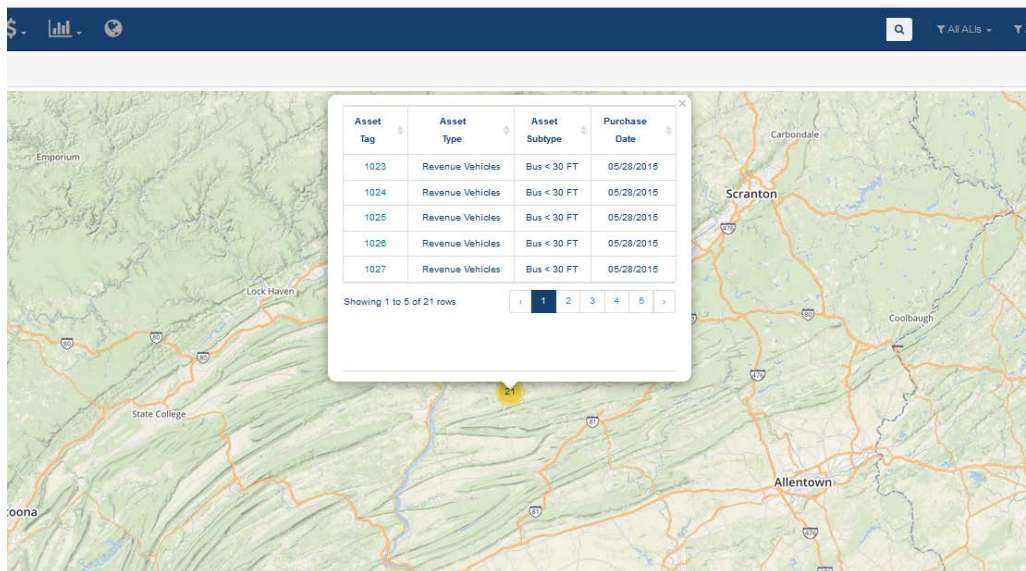

Clicking the top icon allows you to select which layers to display on the map. You can select a default map, the Esri streets map, the Esri Satellite map, or the Esri topographic map as your basemap. Clicking assets will allow you to specify which asset types you wish to display on the map.

Figure 50 Map Layers

Clicking the filter icon will allow you to pare down the assets that are displayed on the map.

Figure 51 Map Filter

Once assets are displayed on the map, clicking a group of assets will provide summary information.

Figure 52 Map Asset Details

4.8 Groups

Agencies can create an on-the-fly collection of assets called groups so that they can quickly recall commonly viewed assets all at once. They can be accessed from the Asset Inventory Menu.

Figure 53 Asset Groups

Individual assets can be added to the group from their details menu.

Figure 54 Adding an Asset to a Group

The screenshot displays the 'Capital Planning Tool (QA)' interface. The breadcrumb trail indicates the path: Home > Revenue Vehicles > Buses (Rubber Tire Vehicles) > Buses (Rubber Tire Vehicles) Profile. The main title is 'Revenue Vehicle Profile' with a subtitle 'CAT : 15GGB2713H3189913 : #1701 : GIL - Gillig Corporation : 35' Low Floor : 2017'.

Below the title is a 'Highlights' section with tabs for History, Tasks, Comments, Documents, Photos, Charts, Asset Values, Capital Projects, and Audit Results. An 'Actions' menu is visible on the right, containing options like Update, Edit, Add to group, Make a copy, Record final disposition, and Remove this asset. An orange arrow points to the 'Add to group' option.

The main content area shows a table with columns 'Event', 'Date', and 'Update'. The table contains two rows of data:

Event	Date	Update
Condition	2/26/2018	Condition recorded as 5.0 (New/Excellent)
Service Status Update	2/26/2018	Service status changed to In Service.

Below the table is an 'Asset Summary' section with a 'Profile' tab. The profile details include:

- Owner: CAT
- Description: GIL 35' Low Floor
- Asset Tag: #1701
- External ID: GIL
- Manufacturer: GIL
- Class: Revenue Vehicles
- Type: Bus 50d 35 FT
- Status: In Service
- Age: 0 yrs
- Mileage: 15600

The 'Identification & Classification' section shows the 'Vehicle Identification Number (VIN)' as 15GGB2713H3189913, the 'Asset ID' as #1701, and the 'External ID' as NTD ID.

5.0 Policies

A Policy is a set of parameters that establishes rules related to assets saved within the system. While an organization can create and modify multiple policies, each organization can only have one current policy at a time. The policy is applied to an organization's inventory on an asset by asset basis so that policy rules are reflected on every individual asset.

Figure 55 Policies Dropdown

The screenshot shows the Capital Planning Tool (QA) interface. The top navigation bar includes icons for Home, Assets, Analytics, Finance, and Reports. The main content area is divided into two sections. On the left, the 'Asset Summary' table lists various asset types with columns for Type, Avg. Age, Count, and Cost. On the right, the 'Capital Projects' table lists projects with columns for Agency, Num. Projects, and Cost. The 'Policies' dropdown menu is open, showing options: Policies, Capital Projects, Project Planner, SOGR Capital Project Analyzer, All Audit Results, and Annual Inventory Update Results. An orange arrow points to the 'Policies' option in the dropdown.

Clicking “Policies” in the dropdown will display the Policy options that are available. Each individual policy also can be accessed through the submenu navigation options, by hovering over the policies selection in the main navigation dropdown.

Figure 56 Policy Rule Sets

The screenshot shows the Capital Planning Tool (QA) interface. The top navigation bar includes icons for Home, Assets, Analytics, Finance, and Reports. The main content area is divided into two sections. On the left, the 'Asset Replacement/Rehabilitation Policy' section displays a table with columns for Policy Name, Description, and Status. On the right, the 'TAM Policy' section displays a table with columns for Policy Name, Description, and Status. An orange arrow points to the 'TAM Policy' rule set.

5.1 Asset Replacement/Rehabilitation Policy

Asset Replacement and Rehabilitation Policies can be chosen under the Policies submenu. The SOGR Capital Project Analyzer, Capital Projects, and Project Planner tools apply this policy to determine the estimated service life, replacement cost, and depreciation of an asset. Asset Replacement/Rehabilitation Policy Rules here can be set at the State or individual organization level. This type of policy set will persist from year to year, unless edited or removed.

Figure 57 Asset Replacement/Rehabilitation Policy

The screenshot shows the Capital Planning Tool (QA) interface. The top navigation bar includes icons for Home, Assets, Analytics, Finance, and Reports. The main content area is divided into two sections: 'Home' and 'Asset Summary'. The 'Asset Summary' section displays a table of asset types and their associated costs. An orange arrow points to the 'Asset Replacement/Rehabilitation Policy' dropdown menu, which is open, showing options like 'Policies', 'Capital Projects', 'Project Planner', 'SOG Capital Project Analyzer', 'All Audit Results', and 'Annual Inventory Update Results'. Another orange arrow points to the 'Asset Replacement/Rehabilitation Policy' dropdown menu, which is open, showing options like 'Policies', 'Capital Projects', 'Project Planner', 'SOG Capital Project Analyzer', 'All Audit Results', and 'Annual Inventory Update Results'.

Type	Avg. Age	Count	Cost	Book
ACTS Revenue Vehicles	3.3	23	\$1,150,393	\$
ACTS Support Facilities	2.0	1	\$403,440	\$
AMTRAN Revenue Vehicles	11.8	29	\$5,460,730	\$2,330,000
AMTRAN Stations/Stops /Terminals	10.6	5	\$58,487	\$20,462
AMTRAN Support Facilities	29.0	5	\$2,274,755	\$1,108,904
AMTRAN Support Vehicles	4.6	7	\$205,513	\$72,536
AMTRAN Maintenance Equipment	12.7	211	\$3,036,981	\$478,390
AMTRAN Facility Equipment	30.5	90	\$2,907,326	\$1,132,105
AMTRAN IT Equipment	6.2	84	\$54,756	\$20,143

Use the organization filter dropdown to choose the correct organization. You will then need to select the policy year that you wish to work with. Pressing the Filter Button will display the policy rules for the organization and policy year that you have chosen.

Figure 58 Asset Replacement/Rehabilitation Policy Filters

The screenshot shows the Capital Planning Tool (QA) interface with the 'Asset Replacement/Rehabilitation Policy' filters. The 'Filters' section shows the 'BPT-PennDOT Bureau of Public Transportation' organization and 'FY 2017 Statewide Transit Policy (Current)' policy year. The 'Policy Rules' section displays various policy rules for different asset types, including 'Support Facilities', 'Support Vehicles', 'Maintenance Equipment', 'Facility Equipment', 'IT Equipment', 'Office Equipment', 'Communications Equipment', 'Signals/Signs', and 'Rail Cars'. An orange arrow points to the 'Organization Filter' dropdown menu, and another orange arrow points to the 'Policy Year' dropdown menu.

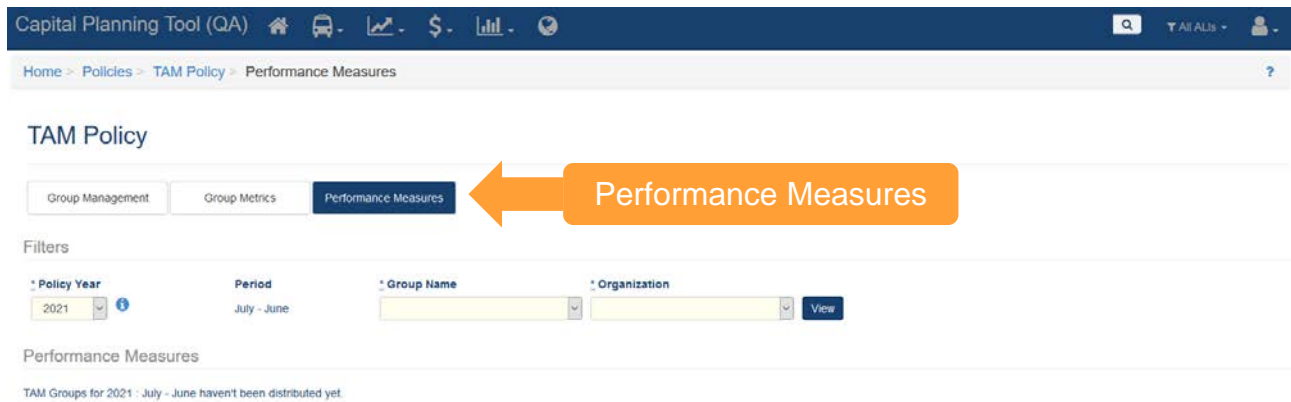

Figure 71 Remove Asset Subtype Rule

5.2 TAM Policy

TAM Policies are used to set Useful Life Benchmark (ULB), Transit Economic Requirements Model (TERM), and Performance Measure Percent targets for asset categories on an annual basis. The TAM Policy will be used to conduct performance calculations for the NTD A-90 report. Ideally, TAM Policies should be set at the beginning of an NTD Reporting year (e.g., July–June, October–September, or January–December). Organizations can be grouped by a common characteristic, and policies can be distributed through the group.

Figure 72 TAM Policy Dropdown Menu Selection

The first step in the creation of a TAM Policy, is to Add a New Policy Year, followed by creating groups. These initial steps can only be completed on the Group Management tab, which is only accessible by users with the TAM Group Manager or Admin permission.

6.0 Projects

An organization creates a capital project when they want to replace their assets or expand their inventory. Each capital project is composed of one or more building blocks, referred to as Activity Line Items (ALI), and is associated with one or more fiscal years. To frame it differently, ALIs should be considered a funding request for a project and each project can have one or more funding requests in a single year or across multiple years. A Capital Project generally falls into one of two categories:

- Projects that use the Asset Replacement/Rehabilitation policy information to replace existing assets to keep assets in a state of good repair. These are known as State of Good Repair (SOGR) projects.
- Projects that acquire new assets that enable you to provide new or expanded services or accomplish new business functions.

All projects created in the system will be listed in the Capital Projects table.

The SOGR projects will automatically be generated by running the State of Good Repair Project Analyzer, which is covered in the project planning section, so we'll quickly review how to create a new capital project manually.

 At the bottom are 'Create Activity Line Item' and 'Cancel' buttons.

Add the required details, then click “Add Activity Line item” to finalize. All manually created projects will automatically appear on the Project Planner.

7.0 Project Planning

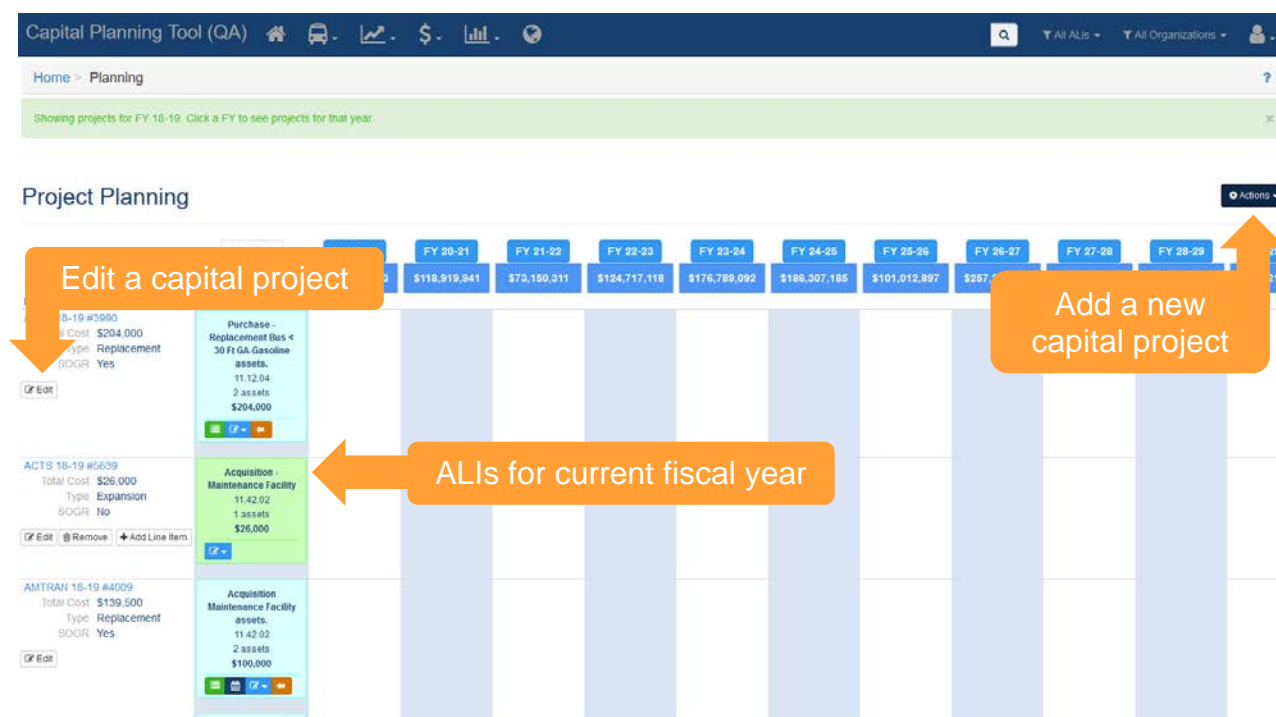

7.1 Project Planner

The project planner is a single interface to perform project and funding request (ALI) prioritization for a multiyear horizon, functioning as a decision support tool. The project planner allows individual organizations to manage their own projects and ALI requests, while parent organizations can view data for all associated child agencies. Users can view and edit projects and ALIs in one view and reallocate assets and ALIs as needed in an interactive table.

Different project types are identified by the color of the ALI. SOGR projects are blue in color, and manually created capital projects are green in color. Shadow projects are projects that are meant to replace an SOGR project that is listed in an earlier year within the timeframe of the project planner (e.g., scheduling replacement of assets that currently are scheduled to be replaced); these ALIs are purple in color.

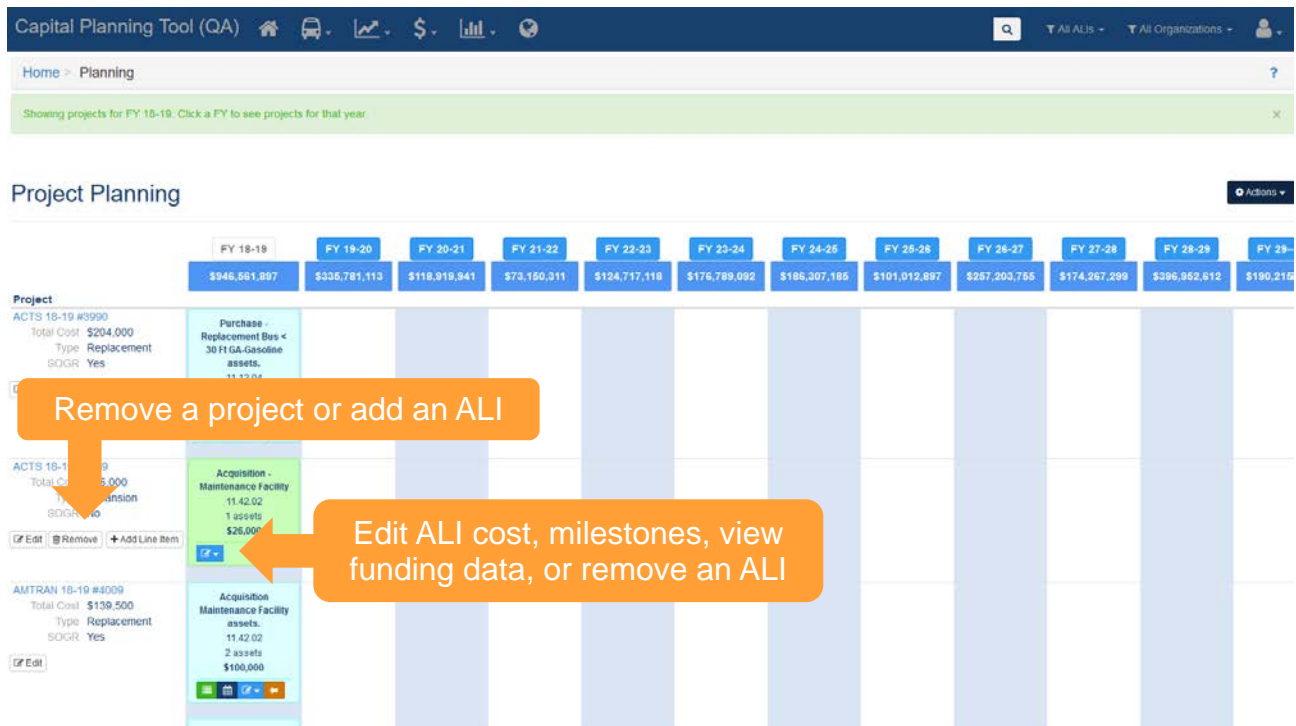

Users can filter ALIs for different years by clicking at the top of each column to bring the corresponding ALIs for that year to the top of the page. Users also can add a new manual capital project directly from the project planner as well as edit existing projects by clicking on the “Edit” button on the left-hand side of the planner.

Figure 82 Project Planner Interface

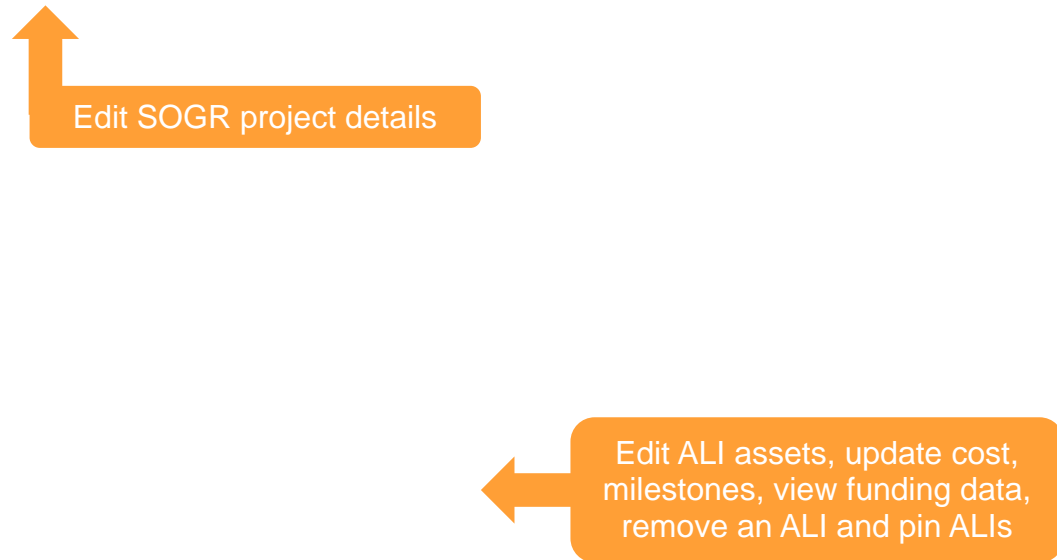

Both projects and ALIs within projects can be modified using multiple methods.

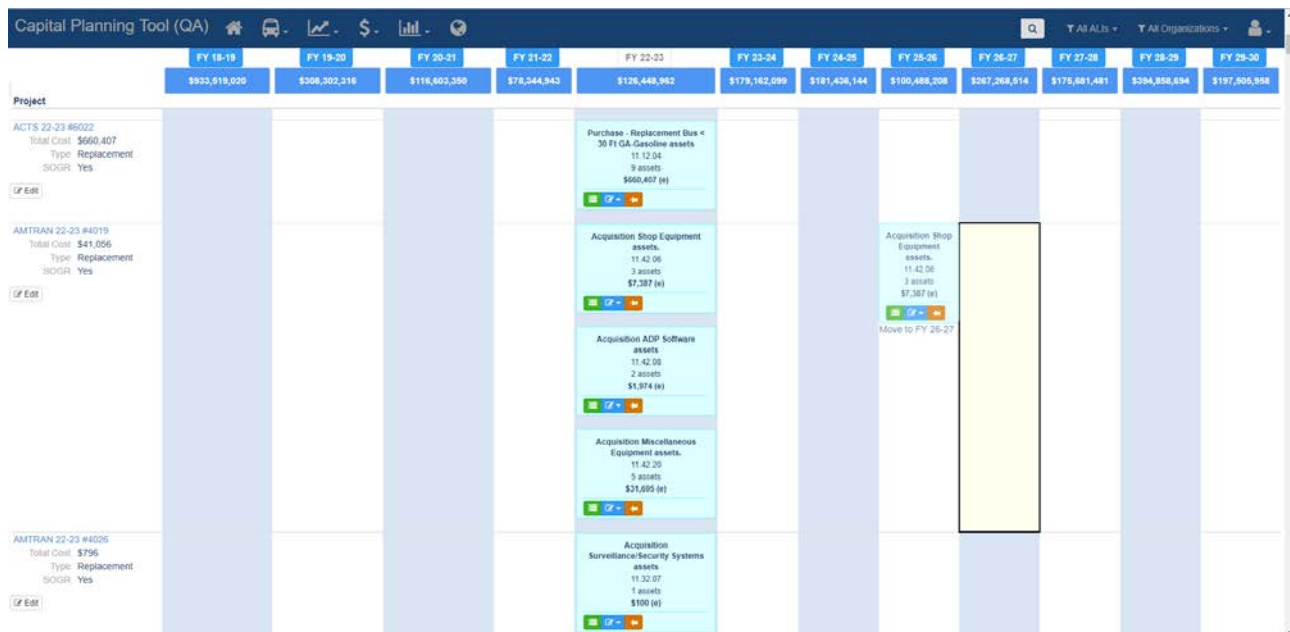

Manually created capital projects can be removed completely and can have additional ALIs added. These actions can be completed by clicking on the “Remove” button or the Add Line Item button on the left-hand side of the planner. ALI details can be viewed or edited by clicking on the icons within each ALI that is included as part of a manually created project.

Figure 83 Edit Manually Created Capital Projects

SOG projects and ALIs include buttons and icons providing users the ability to view assets associated with the SOG projects, remove the assets from the ALI or move the associated assets to a different year, edit cost, update milestones, view funding information and pin an ALI to the project planner. Pinning an ALI allows users to rerun the SOG Capital Project Analyzer, without altering any of the details of the pinned ALI.

Figure 84 Edit SOGR Capital Projects

All projects in the project planner can be prioritized by moving ALIs to different years within the project planner, which can be achieved by using the drag and drop method. Prioritization of projects also can be achieved by removing or moving assets within an ALI to different years.

Figure 85 Prioritize Projects
Move ALIs to Different Years

7.2 State of Good Repair (SOGR) Capital Project Analyzer

Each organization defines an Asset Replacement and Rehabilitation Policy that indicates the service life and replacement standards to be used for each type of asset. The State of Good Repair (SOGR) Capital Project Analyzer evaluates your organization's asset inventory against this policy and generates a set of replacement capital projects for a 12-year planning horizon. Before you run the analyzer, you can select which organization, what asset categories, and what year should serve as the starting year for project creation.

Figure 86 Running SOGR Capital Project Analyzer

The **SOGR Capital Projects Analyzer** analyzes the capital inventory for your organization and generates a set of replacement and rehabilitation capital projects which are added to the capital needs list. This analyzer uses your current **Policy** to determine when assets will be replaced and/or rehabilitated. Once the builder has completed, you will need to review each capital project and update:

- Description of the project
- Justification for the project

* Organization

* **Fta Asset Categories**

- ☒ Revenue Vehicles
- ☒ Equipment
- ☒ Facilities
- ☒ Infrastructure

* Starting Fiscal Year

Run analyzer...

Run Analyzer

Clicking “Run Analyzer” will begin the SOGR job which will run in the background and you’ll be redirected to the Capital Projects page. The system will provide a notification (in your notifications drawer at the top of the screen) when complete.

Figure 87 SOGR Capital Project Analyzer Processing

Capital Planning Tool (QA)

Home > Capital Projects

SOGR Capital Project Analyzer is running. You will be notified when the process is complete.

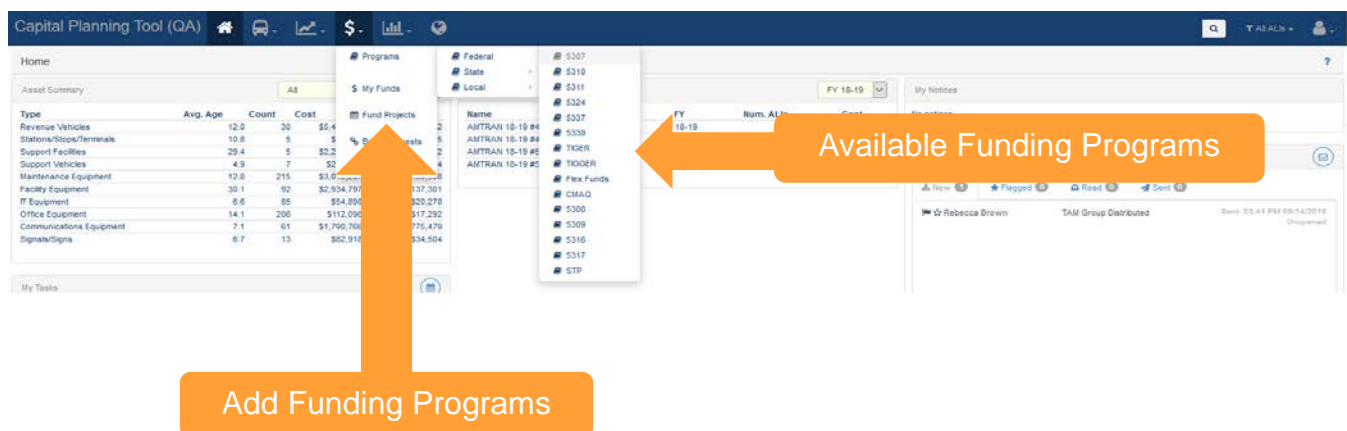

8.0 Funding

Organizations can establish and manage different types of Federal, State, and Local Programs.

8.1 Programs

Programs are different types of funding programs which address specific sets of needs and/or objectives. You can see available programs from the Funding dropdown. All funding programs are categorized into an appropriate Source, such as: Federal, State, and Local. New programs can be added by selecting the “Add Funding Program” link.

Figure 88 Available Funding Programs

Clicking on an individual program will give you specific details about that program, like Templates, Buckets, Assets that were funded by the selected program, as well as other pertinent information such as documents, comments, and program details.

Figure 89 Funding Program Details

9.0 Reports

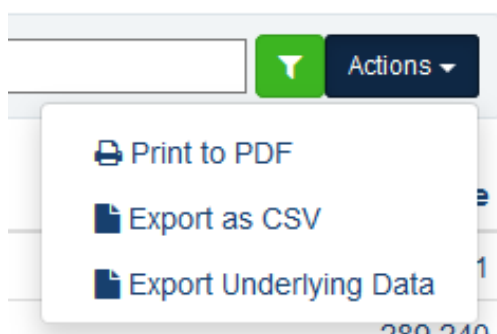

A variety of preconfigured (canned) reports can be generated, ranging in topic areas from Inventory, Capital Needs, System Reports, and Planning.

Figure 90 Reports Dropdown

Reports can be exported into multiple file formats for distribution or further analysis. In the top right corner of each report, look for the Actions menu for available download links.

Figure 91 Report Exports

9.1 Inventory Reports

Inventory reports are a rollup of asset inventory data, including age, condition, and funding related calculations.

Asset Condition Report—The Asset Condition Report displays the count of assets of different types for a range of asset condition ratings (excellent, good, adequate, etc.). The report can filter data by Asset Type.

Figure 92 Asset Condition Report

Asset Age Report—The Asset Age Report displays the count of assets of different types for a range of asset ages (one year old, two years old, etc.). The report can filter data by Asset Type.

Figure 93 Asset Age Report

The Asset Funding Source Report computes for every funding program, organization (agency), and fiscal year, the number of assets that were purchased using a particular funding program as well as the cost associated with that particular funding program. Drill-down functionality allows the user to see the exact lists of assets, and the dollars spent on each asset for that funding source. Multiple filtering options are available, providing the ability to filter by multiple combinations of data:

- Agency, Funding Program.
- Agency, Funding Program, Fiscal Year.
- Funding Program, Agency.
- Funding Program, Agency, Fiscal Year.
- Funding Program, Fiscal Year.
- Funding Program, FY, Agency.
- FY, Funding Program.
- FY, Funding Program, Agency.

Figure 94 Asset Funding Source Report

9.2 Capital Needs Reports

Capital Needs Reports are rollups of information about different asset, projects, ALIs and funding.

The Backlog Report is a list of all system assets associated with individual organizations. The report entails summary data of assets by Subtype, including total count, average replacement cost, and total replacement cost.

Figure 95 Backlog Report

The Unconstrained Capital Projects Report is a collection of unconstrained capital projects associated with individual organizations. This report can be filtered by fiscal year, emergency versus nonemergency, multi or single-year, and method of creation.

Figure 96 Unconstrained Capital Projects Report

9.3 Planning Reports

Planning Reports are reports that analyze asset-based data such as state of good repair, asset status, and metrics related to service life goals and performance.

The Vehicle Replacement Report finds and displays summary data for all revenue vehicles that are scheduled to be replaced within a fiscal year.

Figure 97 Vehicle Replacement Report

Capital Planning Tool (QA)

Totals for FY 18-19			1,182	\$9,141,656	\$97,923,366

The State of Good Repair Report finds and displays summary data for all asset subtypes that are scheduled to be replaced across all planning years. The report is the same as the Vehicle Replacement Report except it is not limited to revenue vehicles and rolls up values across all planning years.

The Asset Service Life Summary Report displays all asset categories, listed by subtype, and calculates the quantity and percentage of assets that are past their Estimated Service Life in month, miles, and the quantity and percentage that have fallen below the TERM threshold as set in the Asset Replacement/Rehabilitation Policy. Data can be filtered by Asset Category, and by a minimum and maximum range in months of assets beyond their Estimated Service Life. A drill-down of data is provided on an organization-level basis, while the table, and the underlying data used to make the calculations can be exported as well.

Figure 100 Asset Service Life Summary Report

All (Filtered) Organizations	Bus 30 FT	9	6	67%	9	100%		
All (Filtered) Organizations	Bus Commuter/Suburban	14	0	0%	0	0%		

The TAM Service Life Summary Report displays all asset categories, listed by subtype, and calculates the following:

- Revenue Vehicles and Equipment—Service Vehicles: Quantity and percentage that are past their Useful Life Benchmark in months;
- Facilities (Primary): Quantity and percentage of Facilities (Primary) that have fallen below the TERM Policy value; and
- Infrastructure—Track: Linear asset miles of Infrastructure that have Active Performance Restrictions.

The ULB, and TERM values pull from the most recent year of the TAM Policy for each organization that are either in a Pending Activation or Active status. Data can be filtered by Asset Category, and a drill-down of data is provided on an organization-level basis, while the table, and the underlying data used to make the calculations can be exported as well.

10.0 Specialized Reports

10.1 Asset Fleet Builder

A fleet is a number of vehicles that share the same characteristics. Organizing vehicles into fleets is advantageous because it summarizes rolling stock inventories at a higher level.

The Asset Fleet Builder is a tool specifically designed to assist with the creation of the Revenue Vehicles (A-30), and Service Vehicles (Nonrevenue) (A-35) National Transit Database (NTD) asset reports. Both of these NTD asset forms require data be reported by fleet, and the Asset Fleet Builder provides an interface to auto-create and easily manage both Revenue Vehicle and Service Vehicle (Nonrevenue) fleets.

When building fleets for the first time, you can choose to use the Asset Fleet Builder. The builder analyzes organization inventories and automatically groups assets into fleets based on the unique fleet definitions and sorts those assets into either the Revenue Vehicles or Service Vehicles section. All assets grouped within a fleet will no longer be listed within the Orphaned Assets portion of the Manage Fleets section. When you run the builder, it will function as a background job in the system and notify you once complete in the notifications section. From there, users can review the fleets, add fleet-specific information or manually regroup assets as needed.

You should only use the builder tool the first time you create a fleet, otherwise you will delete existing fleets.

Figure 102 Asset Fleet Builder

The screenshot shows the 'Capital Planning Tool (QA)' interface. The breadcrumb trail is 'Home > Fleets > Manage Fleets'. The 'Fleets' section has tabs for 'Revenue Vehicles', 'Support Vehicles', and 'Manage Fleets'. Below this is the 'Orphaned Assets' section with a filter bar and a table with columns: Agency, Asset Type, Asset Tag, External ID, VIN, License Plate, Manufacturer, Model, Year Manufactured, Asset Subtype, FTA Vehicle Type, Status, and Action. The table is currently empty with a 'Loading, please wait...' message. Below the table is the 'Asset Fleet Builder' section. A callout box on the right says: 'Note: Running the Fleet Builder will delete all existing fleet data, if previously run.' A blue box contains text explaining the builder's function and a warning. An orange callout box with an arrow points to two buttons: 'Build Revenue Vehicles Fleets' and 'Build Support Vehicles Fleets'.

Note: Running the Fleet Builder will delete all existing fleet data, if previously run.

Build Revenue or Support Fleets

The Asset Fleet Builder analyzes your organization's inventory and groups assets into fleets following parameters set by NTD reporting. If you run the asset fleet builder, you will delete all existing fleets and regroup the assets from scratch. Please note that you will lose any existing fleet data.

Once the builder has completed, you will receive a notification. Please review your fleets at that time and add fleet specific information.

Build Revenue Vehicles Fleets

Build Support Vehicles Fleets

When you add a new asset to the system, the new asset will be added as an Orphaned Asset within the Manage Fleets section.

Figure 103 Asset Fleet Builder—Orphaned Assets

Capital Planning Tool (QA)

Fleets

Revenue Vehicles Support Vehicles **Manage Fleets**

Orphaned Assets

Any Asset Type: [v] Year Mfd: [v] Any Subtype: [v] Any Vehicle Type: [v] Any Status: [v]

Agency	Asset Type	Tag	PU	VIN	License Plate	Manufacturer	Model	Year Manufactured	Asset Subtype	FTA Vehicle Type	Status	Action
CAT	Revenue Vehicles	#1701		15GGB2713H3189913	-	GIL-Gill Corporation	35' Low Floor	2017	Bus Std 35 FT	BU-Bus	In Service	+ Add to Fleet
CAT	Revenue Vehicles	#271	PT Bus #271	1FDFE4FS6HDC18987	-	FRD-Ford Motor Corporation	Champion				In Service	+ Add to Fleet
CAT	Revenue Vehicles	#272	PT Bus #272	1FDFE4FS8HDC18988	-	FRD-Ford Motor Corporation	Champion				In Service	+ Add to Fleet

Selecting “Add to Fleet” on the right allows users to add assets to a current fleet or create a new fleet, and will limit options of existing fleets only if all shared characteristics match. Clicking “Save” will either add to an existing fleet, or create a new fleet, depending on what you choose, and allow you to specify details about that fleet.

Create New Fleet

Click Save to create a new fleet based on this vehicle

Save Cancel

When you add the asset to a new fleet, if you wish to update fleet-specific details, look for the actions button, and click “Update this Fleet” to add details. Users also can remove the fleet completely, at which point all fleet assets will return to the Orphaned Assets portion of the Manage Fleets section. Users also can edit other fleet and asset-specific data such as NTD ID, asset odometer readings, and remove or add assets to the fleet from directly within the fleet.

10.2 NTD Asset Reports

The NTD Asset Reports are forms that must be submitted on an annual basis for every organization that receives Federal public transit funding. Required forms differ between organization, based on the category of assets in operation for each organization. The specific forms are as follows:

- Facilities (A-15) — Pulls asset data for primary facilities.
- Infrastructure (A-20) — Pulls asset data for infrastructure assets, and produces a separate report for each Primary Mode/Type of Service unique combination.
- Revenue Vehicles (A-30) — Pulls asset data for revenue vehicles, which are included as part of a fleet.
- Service Vehicles (Non-revenue) (A-35) — Pulls asset data for Service Vehicle (Non-Revenue), which are included as part of a fleet.
- Performance Measure Targets (A-90) — Pulls ULB, TERM value, and goal percentages for the TAM Policy associated with the corresponding NTD Report year, and calculates performance.

Each report pulls and calculates data according to the reporting year selected, and the activities associated with the system reporting period, i.e., July—June, October—September, or January—December.

Figure 109 Access NTD Reports

Any NTD reports that have been previously generated can be viewed on the initial report table available when clicking on the NTD Reports module. Existing report data can be accessed by clicking on the row for an individual organization upon which point it can be downloaded, submitted for review, have comments added, updated, or removed. New reports can be generated by clicking on the New NTD Form button.

Figure 110 Table of Previously Generated NTD Reports

When you click on the “New NTD Form” button, you will be prompted to select an organization, reporting year, and enter other user-specific information. Upon clicking “Save NTD Form”, you will be directed to the newly created NTD Details and Data page.
