Release Notes

TO: TransAM Users

DATE: May 1, 2021

TOPIC: TransAM Version 2.14.0

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of new features and fixes.

General System Improvements:

- Renamed the Capital Projects Page to "Project"

- Replaced the "Report an issue" functionality with Jira Service Desk for a more improved issue reporting functionality

- Improved the user interface of Funding Requests

- Added the functionality to allow projects & allocations to be deleted

- Added the functionality to allow comments to be added to a Scenario by a logged in user

- Added the functionality for draft phases to have multiple draft funding sources

Bug Fixes:

- Allowed the apportionment year (fiscal year) to be edited when updating a budget.

- Removed duplicated policy years that were depicted within the TAM Policy year filters.

- "Add new policy year" button was missing for TAM policies. This was corrected & is now visible.

- A 500 error was occurring when generating the OPT5B report. This was corrected and the report can now be generated as expected.

- Rows per table user settings were not being captured when the setting was selected. This has been updated.

- Asset Profile information was not being saved when updating a VIN number. This has been corrected.

- A 500 error was occurring when attempting to download bulk upload files. This has been corrected and the files can now be downloaded

- Many of the system reports were not able to download as a PDF and were resulting in a 500 error. This has been corrected.

- Adding capital equipment assets were resulting in a 500 error. Users can now successfully create a new capital equipment asset.

- There were previously no organization options when adding a new TAM Group. Organizations are now rendering as expected.
