Release Notes

TO: Asset Inventory Users

DATE: April 29, 2024

TOPIC: Asset Inventory Version 1.8.0

The following memorandum describes the new features and fixes that have been released to the Asset Inventory platform. This release consists of the following:

Release Includes:

- Added data validation for the Funding Program, Condition, & Purchase Date fields of the inventory tables

- Ensured that the Odometer field is a required value for all revenue vehicles

- Disabled the "New Asset" button for Read Only users

- Removed the odometer reading from SOGR calculation for service vehicles

- Ensured VIN Look-up values for manufacture, model, and manufacture year match system drop-down selections

- Removed case sensitivity for text that was entered into the 'Event Search' field box

- Enabled error validation when odometer value is removed or reduced

- Required users to select both applicable fuel types when 'Dual Fuel' value is selected for Fuel Type field

- Ensured an event is created when a user changes the condition, service status, and odometer values

- Added the ability to export the inventory table

- Added the feature that will allow authorized users the ability to add or delete users directly from the system

- Included 'Last Life Cycle Action' and 'Life Cycle Action Date' within the Export Inventory Grid
