Release Notes

TO: TransAM Users

DATE: September 26, 2022

TOPIC: TransAM Version 2.24.0

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of new features and bug fixes.

General System Improvements:

- Query Tool

    - Corrected the bug identified when sorting column selections

    - Fixed the Query tool export that was showing incorrect asset data

- Allowed the Description field within the Asset Profile to be updated

Bug Fixes:

- Corrected error received when deleting a document in the Document Library – OCDP

- Oversight Review – PennDOT

    - Corrected the error received when opening the link on Document Review for the Document Request URL

    - Removed the 255-character limitation on the Review Page - Finding Areas section and on the Template Page - Required Documents section

    - Corrected the ability to assign the review to defined list of associates

    - Added a "Documents" Tab, and created a Table/Library with all documents that are available and with the ability to search

    - Repaired the date selection to no longer revert back to a prior date

    - Remedied the user's ability to upload or retrieve documents when selecting the 'Document Request' URL within the Oversight 'Review' page in the Document Review section

    - Removed the Text 'File must be provided' text on the Document Request page
