Think Forward

Release Notes

TO: TransAM Users

DATE: April 25, 2020

TOPIC: TransAM Version 2.10.0

The following memorandum describes the new features and fixes that have been released to the TransAM platform. This release consists of new features, and fixes.

Platform Improvements – Application Programming Interface (API):

- The beta version of the TransAM Asset API has been made available. The TransAM Asset API will provide users the ability to integrate external system data with TransAM. The TransAM Asset API will be available to all existing TransAM clients and includes the following abilities:

  - Login utilizing your existing TransAM username and password, and access the API through secure token authentication;

  - Access data based on existing user role and privilege rules;

  - Read, update and delete asset profile data;

  - Create, read, update and delete asset life cycle events; and

  - Utilize the TransAM Query tool to build custom API calls and filter out unnecessary asset data.

Future API additions will include the ability to create, read, update, and deactivate organization and user data. Users will also be able to create, read, update projects and funding data. API beta documentation can be accessed here: TransAM Asset API

Bug Fixes:

- The calendar widget in the date field for the Rebuild / Rehab life cycle event was not working.

- The Activity Line Items were not appearing for inactive projects.

- In some specific instances, the Buckets Committed values was not being reduced for prior year projects.

- An error was being thrown when adding Infrastructure Components & Sub-Components through the bulk template.

- The 'In Service Date' was not saving after being edited for Infrastructure – Track assets.

- Performance Restrictions were not capturing associated asset records correctly.

- The password reset email was not appearing in the message history log when triggering the "Forgot Password" action from the login page.

- The date picker was not viewable for the "Purchase Date" field in the manual add asset creation page.

- Certain asset classes were throwing an error when utilizing the sitewide search functionality.
